Government of the Canary Islands: approx. 7 PAX

Consulate of Slovenia in the Canary Islands: approx. 2 PAX

Port sector objectives:

GENERAL OBJECTIVES

- ✓ To inform the Slovenian market in Luka Koper about the advantages of the enclave of the Port of Las Palmas and its business experience with Africa.
- ✓ To achieve a solid, stable and lasting cooperation that will allow to increase the relationship between companies based in the Port of Las Palmas and Slovenian companies related to the port sector.
- ✓ To search for opportunities in the current crisis to attract new traffic and value-added activity to both ports.
- ✓ To take advantage of the strategic value of Luka Koper. The Port of Koper is of great importance in terms of volume of goods. It offers at that geographical point the main container transport service to Central and South-eastern Europe. It is the first container terminal in the Adriatic and its infrastructure is in the process of expansion. Its annual container throughput is very similar to that of the Port of La Luz. Approximately 960,000 vs. 700,000-1,000,000.
