

<p>1.</p>	<p>Managing Company of Holding «Lidselmash»</p> <p>http://en.lidselmash.by/company</p> <p>1. RYHOR IVANKOU, General Manager</p>	<p>“Lidselmash” was founded in 1901 year as an iron foundry, where production of farming implements and the simplest agricultural machines for horse traction was started. We produce 51 models of agricultural machines. It is potato planters and potato diggers, tillage machines, drills, machines for harvesting of grasses and forages, forest machines, municipal vehicles.</p> <p>In 2005 year “Lidselmash” started production of grain cleaning and drying complexes KZSV-30 and KZSV -40 operating on liquid fuel or gas.</p> <p>The grain drying and cleaning plant is intended for acceptance lots of grains, leguminous, corn, rape and cereals from transport, its subsequent preliminary clearing, drying, time storage and unloading in vehicles or storehouse.</p> <p>New high-technological radiator line was started in July 2009. Radiators “Lidea” are produced at new welding line from leading European producer. Each radiator controls on durability and hermiticity with air pressure of 13 bars, after that it is sent to an automatic painting line. Radiators “Lidea” are shipped packed and completed with a fastening, an air vent, a plug. Each radiator is marked with a bar code in EAN/UNISCAN system. We produce two models of radiators “Lidea Compact” (with side connection) and “Lidea Universal” (with bottom connection). More information about radiators “Lidea” you can find at our web-site www.lidea.by.</p>	<p>Cooperation in the field of agriculture</p>
