

RIKO EKOS

20 let

ABOUT US

The Riko Ekos d.o.o. company was founded in 1993 and is one of the successors of the former Riko company.

Today, the personnel count reaches 38 and with their knowledge, efforts and experience each and every one primarily takes care of the production of systems for comprehensive solutions in waste management, regardless if for separately collected fractions, municipal waste, or industrial waste. Our key motto is focus on the future, as well as the development and efficient solutions for the environmental issues through a successful combination of the extensive know-how provided by in-country and foreign experts in the field of environment.

Besides, for the 20th year in a row, our company has been manufacturing and selling reliable winter equipment, which has been marketed under the new Wintec GmbH brand from 2014 on.

Our work, efforts and development are based on the following vision:

“Being the first choice of a customer who is in the process of selecting a system as a comprehensive solution in waste management, presses, winter equipment, or municipal equipment for the warmer months, as well as provide them with additional services in the shortest possible time.”

- ... Grinding waste materials*

The background is a complex, abstract fractal pattern. It features a large, dark central circle surrounded by intricate, glowing green and blue lines that form a web-like structure. The colors transition from bright green on the left to deep blue on the right, with a black background in the center.
