SMART DESIGN FOR SUSTAINABILITY

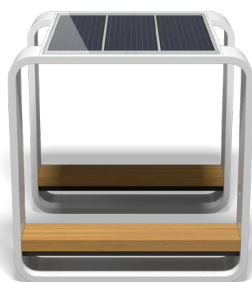

KUUBE PREMIUM QUALITY SOLAR POWERED SMARTBENCHES

WHO WE ARE?

Kuube Hungary Kft. is a Hungarian startup based in Budapest. For us, it is essential to produce smart furniture that combines innovative technology and sustainability, that is why we have chose to work with solar energy.

WHAT WE DO?

Kuube's flagship products are the solar-powered smartbenches. You can choose between three different sizes (Kuube PLUS, Kuube NANO, Kuube ECO) which makes it easier to find the perfect model for any location. They are equipped with USB ports and wireless chargers for smart devices, and unlimited free WiFi hotspot function. They are charged exclusively by solar energy (the batteries use renewable energy only), the place of installation is flexible and they are fully functioning even if the public utilities are difficult to access.

KUUBE^{ECO}

WHAT WE DO?

The benches continuously monitor their environment – temperature change, UV level, air quality, humidity, air pressure – and forward the data to the server, or notify the owner if necessary. They have 2,4" RGB displays and RGB ambient LED light.

All of our products are made of 100% aluminium – stainless, recyclable aluminum chassis – and tempered glass. Because of the durable quality, there is no need to deal with the environmental impact of waste due to depreciation. Besides sustainability, optimal heat dissipation and longevity were our main objectives during the designing process.

TO WHOM WE RECOMMEND

Kuube smart furnitures are made for the B2B market. Our products are designed for public spaces and community venues, therefore our primary target groups are:

- local governments,
- institutions,
- event centers, conference centers, stadiums
- cultural institutions, museums, theaters,
- shopping malls,
- hotels,
- festivals,
- beaches, baths,
- zoos,
- park forests, castle parks,
- universities, schools,
- office buildings,
- residential parks
- hospitals, etc.

SMART CITY INVESTMENTS THROUGH DIGITAL DEVELOPMENTS FOR THE LOCAL COMMUNITIES

Nowadays, there is a smartphone in almost everyone's pocket and it has become completely natural to have access to information anywhere, anytime. However, there may be a situation in the middle of the street, where we notice: our phone is dead or our mobile net has just run out. The 21st century cities have to find a solution to these problems through digital developments. Kuube smart street furnitures can be the cornerstones of these smart city developments.

For us, smart furniture is not only green future, but also a great investment in communities.

Kuube smartbenches are not just alternatives to regular urban benches, but also meeting points where friends gather and listen to music or even show each other videos via our free wifi. The functions provided by the bench are almost unnoticed during the time spent together, the real emphasis is on the shared experiences and the happiness for each other.

FOREIGN EXPANSION

From the summer of 2020, the long-established company Tungsram has become our distribution partner. The first stop of our cooperation was the town of Skradin in Croatia, where we have placed a Kuube PLUS smartbench in August.
