## Editor's Intro

Here it is: The first number of the Marketing Journal **BUSINESS PARTNER UKRAINE**: [bpu](#)

This project was created to show the potential of Ukrainian companies to the international market and to improve the image of the Ukrainian business in general. The first issue includes 18 companies that are leaders in their industries - all reliable partners to work with.

As owner of U.B.Con and representative of UCCL in Austria, I would like to assist you finding your way in this market, if you are considering entering. If you are already active in Ukraine, you may find new partners for a fruitful cooperation.

In the future, the journal itself will be revised regularly with new entries.

I will be glad to establish contact with the participants and organize joint meetings. Our goal is to present you good and, above all, right partners. This has always been one of the biggest challenges in business life.

I hope that this new project will catch your interest and be a useful helper if you are looking to Ukraine.

I wish you health, happiness and success!

Yours Rainer Staltner

## Melitopol Oil Extraction Plant LLC

**The Melitopol plant was founded in 1945 and is working under new management since 2004. 2009 was put into service a workshop for the production of hydrogenated fats with a capacity of 100 tons per day.**

**2014 was finalized the reconstruction of production facilities with the installation of modern filtration and increase of production capacity.**

**2016 was implemented a new line for production of Refined Deodorized Winterized Sunflower Oil.**

Products and Activities of the factory:

- Crude Virgin Sunflower Oil (100% pure pressing)
- Crude Unrefined Sunflower Oil / first quality (mixture of pressed oil with extracted oil)
- High Oleic Crude Virgin Sunflower Oil / oleic acid 75 - 84% (100% pure pressing)
- High Oleic Crude Sunflower Oil / oleic acid 75 – 84% (mixture of pressed oil with extracted oil)
- Refined Deodorized & Winterized Sunflower Oil
- Sunflower Meal Granular
- Fuel Pellets from Sunflower Husks

The factory installed a bottling station for filling up the oil into bottles of 1, 3 and 5 liters. We dispatch the oil also in tanks and flexi tanks.

Production Capacity per month:

- 6.000 tons of Crude Sunflower Oil
- 3.000 tons of Refined Deodorized Winterized Sunflower Oil
- 6.000 tons of Sunflower Meal
- 1.500 tons of Fuel Pellets

## PJSC Pharmaceutical Company DARNITSA

The Company was founded in 1930. More than 85 years DARNITSA has been providing solutions in cardiology, neurology and pain syndromes.

Nowadays we are the Nr. 1 in the rating of 'National Trust' among Ukrainian and CIS drug manufacturers.

During the last ten years a large amount was invested into the productionline and the factory has been completely modernised. As a result of this huge work DARNITSA received EU GMP Certificate: The production meets all international requirements.

Our production site covers a territory of 30.000 sqm and today we manufacture per year more than 460 million ampules, 4.2 billion tablets, 50 million soft dosage form tubes, 40 million drop bottles, 30 million cephalosporin antibiotic vials and 15 million infusion solution vials.

Anually the Company launches 7 – 8 new products, the product portfolio consists of over 250 items.

DARNITSA is specialised in the manufacturing of:

- solid dosage forms (tablets, coated tablets, capsules)
- soft dosage forms (ointments, creams, gels, shampoos, topical liquid mixtures)
- solutions for injections in ampules
- infusion solutions
- drops (sterile and nonsterile)
- sterile powders for infusions and injections.

DARNITSA offers 15 different types of therapeutic medicine for such indications as:

- Cardio-vascular diseases
- Nervous system diseases
- Headache
- Pain syndromes
- Gastrointestinal diseases
- Microbial diseases
- Skin diseases
- Alcohol intoxication

We export our products to more than 14 countries and highly welcome partners for cooperation in sales operations and contract manufacturing.

We improve the lives of people!

In 1930 the company was established as KIEVKAUCHUK close to the centre of Kiev. After the reorganization in 1994 it was named KIEVGUMA. In 2013 the production was moved to a totally new built plant in Brovary, a suburb of Kiev.

We are one of the world's largest manufacturers of products made of rubber, latex, silicone, TPE, PVC and other plastics.

The wide range of our assortment consists of more than 3.500 different articles, with an export rate over 50% to 22 countries.

We have international standard compliance as ISO 9001: 2009 (ISO 9001: 2008), DSTU ISO 13485: 2005 and the international certificates of TUV SUD ISO 9001: 2008 and TÜV Austria EN ISO 13485: 2012.

KIEVGUMA as well is a highly social oriented enterprise providing home work to disabled persons, who cannot leave their houses. They are preparing plastic accessories for the final products assembly.

We are running a complete production cycle: starting from imports of raw materials, development and testing in our own certified laboratory, design of mechanical facilities, manufacturing of semi-finished and finished products, mechanical workshop for current and major repairs and producing machinery equipment, power engineering including MOC. The company consists in total of 33 departments and modern production lines at the latest standards are securing high level quality.

Our products you can meet in many fields of daily life:

- Medical goods including medical stoppers and caps, medical gloves
- Products for children (our own Trademark: "Flowers of Life")
- Several devices for breastfeeding mothers
- Labor safety devices
- Pet accessories
- Items for sports and household
- Rubber weather-strips for windows and car-screens
- Molded and unmolded rubber goods for industrial use
- Membrane fabrics and rubber check balls for oil and gas industry

## **PJSC INSURANCE COMPANY INTO**

The Medical Company INTO-SANA and Insurance Company INTO were established in 1995 in Odessa. We have been implementing medical insurance programs to provide emergency, outpatient and inpatient care to the population in the south region of Ukraine.

During the years we became the leading provider of medical services in the region. We count today more than 1.000 enterprises and a big number of physical persons to our customers in the cities of Odessa, Chornomorsk, Yuzhniy and Ismail.

Our services consist of Medical Insurance Contracts providing our customers with quick ambulance, covering high professional first aid, stationary hospital, diagnostic and medical centers including modern laboratories, as well as medical family assistance. Many years of experience and high qualified specialists allow us to guarantee medical assistance to every Insured person in time.

In the years of its activity INTO-SANA raised the medical care of the population in the Southern region to a completely new standard.

Another 3 medical care centers including diagnostic centers were established in Kiev during the last years.

**WE SAVE LIVES!**

**VELES AGRO** was founded in 1996. We are manufacturing multifunctional high quality agricultural equipment using modern low cost technologies. Over the past twenty years of continuous development and improvement, the company took a well-deserved place among the leading manufacturers of agricultural machinery and spare parts.

The geographical map of exports covers Asia, Eastern and Western Europe, Africa and Australia. The range of manufactured spare parts for tillage and sowing equipment exceeds **1.500** items. High qualified personnel, a team of talented engineers as well as close contacts to our suppliers allow us to react promptly to current trends and needs of the agro-industrial market.

The full-mold casting technology allows manufacturing the parts with minimum machining allowances and using the solid-cast structures in the production of finished products. Owing to the introduction of the technology for high-strength steels machining, we have significantly increased the service life of manufactured tillage tools made of boron steel.

In the production we use the equipment for precision plasma arc cutting of high-strength steel as well as intelligent machines that make the parts in 3D with maximum precision.

Under the brand-name **VELES AGRO** commercially available:

- combined tillage machines
- disk harrows
- grain and mechanical precision seed drills
- cultivators
- dump and reverse ploughs
- subsoilers

**Reasonable pricing, reliability and varied, constantly improved range of products, high quality and fast service support** – these are the components of the foundation on which **VELES AGRO** is building the long-term relationships with customers and trading partners.

## **PJSC Odessa Cable Plant ODESKABEL**

**Activities:** development, production, certification testing and implementation of cable products and cable systems.

The Odessa Cable Plant was founded in 1949.

Today it is the largest manufacturer of cable and wire products in Ukraine. It is a modern factory with a production area of more than 50,000 square meters and a staff of more than 800 experienced specialists.

### **Advantages of working with ODESKABEL:**

- Production equipment, materials and testing equipment from well-known manufacturers
- More than 10 000 cable-conductor products in the plant's nomenclature
- Development and introduction of new cable designs in accordance with customer requirements, possibility of OEM-production
- The latest version of the ISO 9001:2015 quality management system has been implemented, as well as the ISO 14001:2006, OHSAS 18001:2010 and SA 8000:2008 systems
- We own accredited testing laboratories
- Developed network of branches, warehouses, representative offices both on the territory of Ukraine and abroad
- Short delivery terms to Europe, North Africa and West Asia due to the convenient geographic location of the plant optimization of logistic system

### **Production Portfolio of ODESKABEL:**

- Fiber-Optic Cables
- LAN cables
- Communication cables
- Power cables, wires and cords
- Radio Frequency and special cables
- Heating cables

The products of ODESKABEL are used in many various spheres:

**1. In telecommunications:**

- to provide communication between settlements;
- to provide communication in settlements between buildings;
- to provide communication within buildings;
- in structured cabling systems;
- in television and for wire broadcasting.

**2. In construction:**

- for installation of power and lighting networks;
- in video surveillance systems;
- in security and fire alarm systems;
- for “intelligent home” systems;
- to ensure the security of objects.

**3. In mechanical engineering:**

- for household electrical appliances;
- in stationary equipment (machines, industrial electrical equipment);
- for the production of cable-conductor products of the copper group.

**4. In the mining industries:**

- for industrial blasting operations;
- for mine communication systems.

**5. In the energy sector:**

- for overhead power lines;
- for cable lines with voltage up to 35 kV;
- for alternative energy sources;
- for nuclear power plants.

We fulfill warranty obligations for 3 years, while the average life period of the cables is 25 years.

ODESKABEL is a reliable partner for complex solutions of our customers. We are continuing further development, improvement of production technologies, improvement of the quality of products and services. As well as we want to enlarge the geography of sales.

## UKRFERRY LLC

The Shipping Company UKRFERRY was established in 1995. We started as an operator of Rail-Ferry services Chornomorsk - Varna. As a result of continuous growth, the company became the largest Black Sea ferry operator. We offer regular traffics between Ukraine and Georgia, Ukraine and Turkey, transit shipping services to Armenia, Azerbaijan, Kazakhstan, Turkmenistan and other sates of Central Asia, as well as Iraq, Iran and China.

The range of services rendered includes railway ferry services, Ro-Ro, construction equipment, general and project cargo, container shipping, passenger transportation, freight forwarding services around CIS states, Black Sea region, door-to-door deliveries and travel services.

The company operates a fleet of up-to-date Ro-Pax ferry vessels, each ferry capable of carrying up to 50 railcars, 45 17m long truck trailers and 250 passengers.

Annually we are carrying up to 5000 railcars, 20 000 truck trailers and 30 000 passengers.

UKRFERRY already has all organizational, technical and technological capabilities to implement future transport routes:

- shipments between Europe and China along International Transcaspian Transport Itinerary (ITTI)
- shipments between Europe and Iran coming through Ukraine, ferry service Ilyichevsk-Poti/Batumi including railway shipment to a border of Azerbaijan and Iran (custom check-point Astara)
- an extension of shuttle train Viking to embrace Turkey by using Chornomorsk-Haydaprasa ferry service

Our open and flexible tariff policy is based on market situation and customers' demands. All the information on tariffs, ferry services and schedules is available for wide audience at [www.ukrferry.com](http://www.ukrferry.com)

UKRFERRY had been appointed to act as "the designated enterprise" in fulfilling international agreements on joint operation of rail-ferry services that connect Ukraine, Georgia and Bulgaria.

We have received the status of a National Carrier of Ukraine, which grants a priority in fulfilling governmental and international shipping agreements of Ukraine.

## TIS CONTAINER

TIS is the No. 1 port in Ukraine. In terms of turnover, TIS is the leader among all Ukrainian ports, both public and private. According to the results of 2017, TIS processed over 25 million tons of cargo, which is about 20% of the total volume of cargo passing through Ukrainian ports.

TIS operates 5 high-tech marine terminals: TIS Coal, TIS Ore, TIS Grain, TIS Fertilizers and TIS Container Terminal.

TIS - Container Terminal is the newest and the deepest in Ukraine. In 2016, the terminal received the Best Service Award from the Association of International Freight Forwarders of Ukraine. The total cargo turnover of the terminal in 2016 was more than 3,5 million tons, exceeding the previous year by 45%. Container handling in TEU calculation grew by 51%, making an annual record among the ports of Ukraine.

In 2017, TIS actively invested in building the capacities of its Container Terminal.

The terminal berth is extended to 600 meters. The terminal is equipped with two additional container loaders of the post-Panamax type. Thus, there are 5 STS-loaders operating at the terminal at berths with a total length of 600 meters, which can, at the need and allowing constructiveness, handle ships simultaneously. To handle new, expanded, capacity, TIS completed 16 additional meters of railroad tracks at its own railway station, which is operated by the company. Only on the TIS-Container Terminal, the length of the railway tracks is 16 km, with a total of 60 km of railway tracks on the TIS.

Capacity of the full development of the Container Terminal TIS is 400 thousand containers per year. In the second quarter of 2017, a regular container train began to run from the terminal to the river port of the city of Dnjepr – a distance of 630 km - and back. The capacity of one container train is 100 TEUs. The whole range of operations including loading and unloading of containers from railway platforms, as well as dispatching and receiving a full-length train in the ports of TIS and in Dnjepr takes less than 24 hours. Also, by the end of the year the project for the direction of the fast train TIS-Kiev will be launched.

## LLC “TRANS-SERVICE”

LLC “TRANS-SERVICE” was established in October 2014. are specialized in grain handling. Besides this, the Company handles other bulk and general cargo (clay in bulk, sugar in big-bags, wood chips in bulk, equipment etc.). The Company operates a horizontal warehouse for grain with a storage capacity of 60 000 tons. A drop height of 7 meters in the warehouse excludes the damage of the grain.

LLC “TRANS-SERVICE” is offering the following services:

- Handling of grain through the **horizontal warehouse**;
- **Loading of grain directly from railway wagons to the vessel's hold (abt. 150 railway-cars per day)**;
- Grain products stuffing to containers;
- Own laboratory for testing of grain quality;
- Custom broker;
- Forwarding;
- Weighbridge for wagons and trucks;

The laboratory is equipped with latest high technology devices of “PERTEN” and “CHOPIN” allowing quick and qualitative analysis of grain cargoes.

LLC “TRANS-SERVICE” has following equipment for cargo operations:

- Five gantry cranes with 50 tons capacity each;
- Eight JCB bucket loaders;
- Two forklifts TOYOTA, 10 tons lifting capacity each;
- Two forklifts KALMAR, 16 tons lifting capacity each;
- Specialized ship loader TELESTACK with a capacity of 750 tons/hour;
- Specialized stuffer TELESTACK “HF 521T” with a capacity of 250 tons/hour;
- Scales for wagons up to 150 tons;
- Two stations for unloading grain from wagons with a productivity of 60 wagons per day;
- Two stations for unloading grain from trucks with a productivity of 110 trucks per day;

We warmly welcome our partners to cooperate on our terminal in the **Commercial Sea Port Chornomorsk!**

## PJSC MTB BANK

MTB BANK is the new brand name for MARFIN BANK, the assignee of SEA TRANSPORT BANK, which was founded on 05.11.1993 in Odessa.

At a high quality level the bank offers the full range of bank services. The head office is located in Odessa and has branches in Kiev, Kharkov, Dnepr, Nikolayev, Chornomorsk, Kherson, Poltava and Kremenchug.

As of 01.11.2017, the Bank has been operating through a network of 42 branches that provide services to more than 10 300 enterprises and organizations – legal entities, and more than 170 000 of retail customers.

Corporate customers of PJSC «MTB BANK» are offered a range of **credit operations both in the national and foreign currency**:

1. Factoring financing, overdrafts, loans and credit lines for working capital needs.
2. Loans to purchase commercial real estate, equipment, automotive and specialized vehicles.
3. Investment projects financing, etc.

MTB BANK is a professional partner in the market of securities and offers trading in securities, depository activities and storage of institutional assets of joint investments

We have the highest level “5” of reliability on deposit rating, given by the independent Agency 'Credit Rating'. This evaluation has been kept by the bank since February 2009 until today. The rating is carried out on a monthly basis. The same Agency has been awarding MARFIN BANK with “uaA” level since May 2007; the latest confirmation took place in June 2017. The outlook is stable.

We correspond to all standards of the National Bank of Ukraine, not attracting other banks' resources on the interbank market and not using refinancing and/or stabilization loans from the National Bank. The authorized capital is 435 millions Grivna (UAH).

**ANK** Law Office was established in 1996 and through the years of extensive legal practice has become one of the leading law firms in Ukraine. Since more than 20 years we successfully have been advising our clients in the most different matters of Ukrainian law.

As a result of dynamic development we combined the unique experience and created a high-qualified professional team of 25 lawyers and auditors; each of them being an experienced specialist in his field of legal practice. We provide regular legal support to our clients in the most difficult projects and deals. Employees of ANK are regularly invited as experts by leading Ukrainian business Medias to comment and explain latest legislative amendments and governmental initiatives.

ANK Law Office provides complex legal support to grain-, oil- and container-terminals in Ukrainian ports. We advise clients in the process of attraction international financing from IFC, EBRD and other financial institutions. We act as Ukrainian legal counsel to the container shipping lines, ship-owners and ship-managers as well as P&I Clubs. Our Corporate and M&A advisors assist clients in establishing business in Ukraine, licensing procedure and business restructuring. We have a strong team of court lawyers and attorneys-at-law who are ready to protect clients' interests in the court.

Due to the large network of correspondent offices abroad, ANK Law Office can arrange effective legal assistance almost everywhere in the world. We cooperate with maritime administrations and classification societies and therefore we are also able to provide clients with professional legal assistance during sale and purchase of vessels and yachts.

ANK lawyers are fluent speakers in **English, Ukrainian and Russian.**

**Areas of practice:**

- Agriculture and Land
- Arbitration and Litigation
- Corporate Law and M&A
- Infrastructure and Real Estate
- Shipping and Maritime Law
- Tax and Legal Due Diligence

## ROST OUTSOURCING

ROST OUTSOURCING, as a leading part of ROST GROUP was founded in 1998, when our team had decided they were willing and able to deliver global pharmaceutical achievements to their native country healthcare market. At that time Ukraine lacked effective medicines from abroad and foreign companies were afraid of entering newly opened post-soviet market. The team of ROST GROUP was among the first, who were brave enough to accept this challenge.

### **Significant stages of development and growth:**

**1998: Commencement of operations on provision of outsourcing services in marketing technologies**

**2006:** Development of out staffing, exclusive distribution and promotion

**2012:** ROST GROUP becomes a member of the European Business Association

**2016:** ROST OUTSOURCING ranks 17th in the rating of domestic marketing organizations in Ukraine

**2017:** Armadin (promoted by us) occupied 18th place among all drugs on the Ukrainian market

### **We provide you with:**

#### **Sales outsourcing:**

- ✓ conducting market research and developing a promotion strategy
- ✓ selecting tools to implement the strategy
- ✓ providing resources (human, financial, material, information)

#### **Representation services:**

- ✓ market analysis and implementation of a sales strategy
- ✓ registration and distribution
- ✓ creation of a portfolio and promotion

### **Our expertise:**

Besides having impressive experience in different therapeutic areas, we are especially experienced in: **Cardiology, Neurology, Gynecology, General Medicine and Surgery.** We know how to choose fields of activities and focus on areas on your particular interest. Our partners are manufacturers of **pharmaceuticals, bioactive ingredients and medical devices from all over the world.**

**We are aimed at long-term cooperation:** Our average contract persists for 3 years.

**Execution of the project tasks and plans according to the sales dynamics:**

Our customers are expanding their portfolios.

**Concentrate on the main things, leave the rest to us!**

## **RENOMA Ltd.**

We are a honey producing company, designed for export. For this we have the status of an official exporter, issued by the Ukrainian Food Safety and Consumer Protection Agency. We deliver our products mainly to the European Union, USA, Canada, the United Arab Emirates.

The product range of RENOMA includes the honeys: acacia, linden, rapeseed, buckwheat, sunflower, coriander, forest honey.

Our constant quality control guarantees the best honey free of antibiotics, heavy metals and other harmful substances.

The production site of our private company with goods receiving, storage, processing, packaging and shipping is located in the Lviv Region, 30 km from the border with Poland and therefore offers favorable conditions for export to the EU countries. The headquarters of the company is in Kiev.

Our current production capacity is 1,000 tons per year. Delivered in 200 liter metal barrels (weight 290 kg) and in 10 liter plastic buckets (weight 15 kg). In the near future, we will also be able to deliver in smaller packaging units.

Ukrainian honey has a special taste, which has made Ukraine one of the leading exporters - 3rd place in the world's ranking.

From Ukraine for the world – Honey from the bees!

## VESTA LIGHT

We are manufacturing decorative lamps. The company was founded in 2004.

Our production site, which includes an area of 2.500 sqm, is organized as a closed production cycle and consists of:

- a design and engineering department
- a sheet glass processing shop
- a sheet metal stamping shop
- a milling shop
- a metal and glass painting shop
- a wood processing shop
- a tool shop, providing an independent production of devices and spare parts for our machines

Our overall production capacity exceeds 1 million lamps per year.

In 2017 we produced and sold 300.000 units.

The main market today is Ukraine, but we are also exporting to Moldova and Belarus.

In 2017 we achieved the Certificate that our products comply with the standards and guidelines of the European Community.

## 3 Betony LLC

We are a unique plant on ferroconcrete items and construction production, one of the biggest in Ukraine. The main directions of the Company's activity are the manufacturing of pre-stress ferroconcrete items, their transportation and mounting. Our strategy is the constant renewal of the technology, improvement of product's quality and assortment.

3 Betony was founded in 2002 by ASA, FERROBETON and KESZ - Hungarian leaders in building industry.

The reconstruction of industrial and business units were carried out in short terms and in 2004 the modern technological equipment and installment of the concrete station "ELBA" were completed, the areas for materials storage built, two sidetracks renewed, the boiler station equipped, the administrative building repaired, the systems of power and water supply renewed. As from February 2004 we started our economic activity. 3 Betony uses modern production technologies, especially bench technology with mechanical pressure of wire-rope reinforcement, production of concrete mixtures with use of chemical additives and application of universal equipment that makes it possible to produce non-typical constructions of excess complexity of different dimension types – unique large-span elements for the building of trade centers, industrial, sport and recreation objects, large warehouses, bridges etc. In 2006 – the production shop No. 3 with three technological lines for main and bridge beams production and shop No. 2 with technological line for hollow ceiling panel production of total length to 18 m were set in operation.

One of our founders – Hungarian company FERROBETON is a European leader with great experience in production of concrete structures for road infrastructure, in particular the bridge beams of total length up to 40 m. Our technology and equipment make it possible to manufacture the same products for Ukrainian market.

LLC 3 Betony has 360 employees. The territory of the plant includes 13,6 ha. Stability, high quality of the products, fulfillment of all obligations is our main principle.

## PJSC UKRENERGOMONTAZH

We are one of the leading construction and assembly companies in Ukraine, providing services for the implementation of projects of any complexity in the field of radioactive waste management, in nuclear and thermal power engineering, as well as in industrial and civil construction.

UEM has significant experience in implementing unique projects in close cooperation with Ukrainian and foreign suppliers of technologies and equipment, as well as with international financial organizations.

Main activities:

- Design, construction, reconstruction of industrial and civil facilities;
- Engineering of projects;
- Manufacturing metal structures;
- Construction and installation works;
- Construction of nuclear power facilities;
- Construction of facilities intended for handling radioactive waste.

The most important projects implemented:

1986 - 1995

- Installation of the separation wall between the 3rd and the 4th power units of the Chernobyl Nuclear Power Plant
- Construction of the city of Slavutich (close to Chernobyl)
- Construction of the Crimean and South-Ukrainian Nuclear Power Plants
- Construction of the Kremenchug Heat power Station and Burshtynsky Heat Power Station
- Conservation of the 5th and 6th power units of Chernobyl Nuclear Power Plant

1995-1998

- Dismantling of mechanical and power equipment in the premises of the 4th power unit of the Chernobyl Nuclear Power Plant
- Construction of a spent nuclear fuel storage facility
- Construction of a plant for the processing of liquid radioactive waste
- Construction of an industrial complex for handling solid radioactive waste

1998 - 2017

- Implementation of the plan for implementing the steps of the gradual transformation of the Shelter Object into a safe facility (Shelter Implementation Plan project) at Chernobyl NPP
- Stabilization measures at the Shelter Facility of the Chernobyl NPP
- Construction of a modernized system of physical protection and access control of the Shelter facility of the Chernobyl NPP
- Construction of the fire protection system of Chernobyl NPP
- Organization of an integrated automated control system for the Shelter
- Construction of a new ventilation pipe and associated systems of the 2nd stage of the Chernobyl NPP
- Construction of a radiation monitoring system for the spent nuclear fuel storage facility of the Chernobyl NPP

Partners:

EBRD, UKRBUD, ANSALDO / ARS, JV NOVARKA, Atomstroyexport, SARENS, NNEK Energoatom, SSE Chernobyl NPP, Kyivmetrostroy.

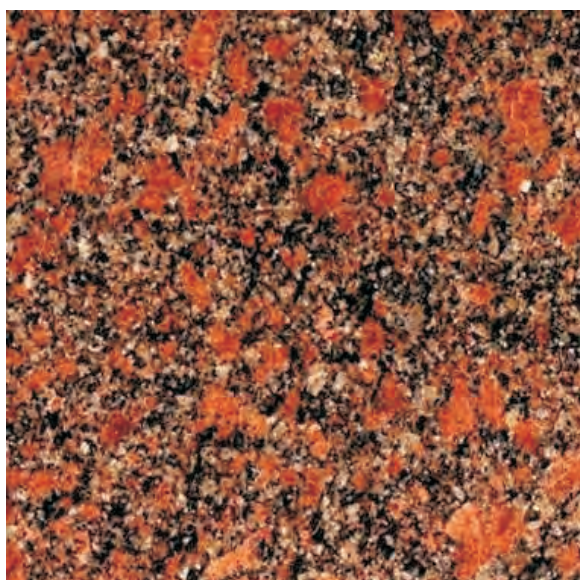

PJSC UKRENERGOMONTAZH is open to any organizations and enterprises interested in cooperation. Having sufficient production, material and labor resources, we are a reliable partner for those who value professionalism, quality and decency in work!

## GRANIT MIKOLAIV

Our enterprise has been working on the granite market for many years. We produce different categories of granite blocks, which there are from first (size: 5 cubic meters) to fifth category (0,5 cubic meters). and at is discussed in advance and separately.

The stone where the blocks are mined is located in Ukraine in the Mikolaiv Region, the deposit is called Novodanilovsky, and the stone itself is called Withered. Its mechanical properties make it one of the most durable granites and it is also one of the cleanest in terms of radiological properties, so it can be used even in residential buildings.

## REISEWELT UKRAINE

We are a tour operator (with Austrian roots) specializing in Ukraine travel.

We are located in Lviv (Western Ukraine) and are an experienced team for all trips to Ukraine, as well as round tours and study trips. You will enjoy active tours in the Carpathians such as cycling, hiking, skiing, rafting, horse riding, mountain bike tours or green tourism in the Ukrainian Carpathians.

We book the best hotels for you. Our guided tours will take you by comfortable minibus or bus, by train or on domestic flights. Entry into Ukraine is free of visa for many states - the passport must be valid for at least 3 months. You can also enter Ukraine by car, currently we recommend entering Hungary via Ukraine.

Ukraine offers beautiful destinations, UNESCO World Heritage Ukraine, Western Ukraine with Galicia, the former capital of (Lviv), the Ukrainian Carpathians with the highest mountain Hoverla, Chernovtsy and Bukovina, the capital and largest city of Ukraine - Kiev. Kiev is also the starting point for a Chernobyl tour. In southern Ukraine lies Odessa, the city and pearl of the Black Sea.

Further to the south and thus in Bessarabia: one of the biggest highlights and 'must visit' of the Ukraine - the Danube Delta, of whose biosphere reserve 30% are located in Ukraine. The town Vylkovo, also called Venice of Ukraine, is the starting point for tours in the Danube Delta. Fishing in the Danube Delta or just eating fish in the Danube Delta is a top tip from REISEWELT UKRAINE.

With us you can also book trips to the Caucasus, combined with a trip to Ukraine.

We are specialists for event management in Lviv, event organization in the Carpathians:

Corporate journeys, sales seminars, corporate incentives or just a fancy motivational event for your team and employees.

YOUR PARTNER for Travel & Events!
