

Seznam podjetij in institucij iz češke poslovne delegacije

Kongresni center Brdo, 20. Oktober 2026

12.10.2026

	Company / Institution	Sector	Activities	We are looking for:
1	ASEKOL a.s.	Waste management & circular economy	ASEKOL is a Producer Responsibility Organization representing the manufacturers and importers of electrical and electronic equipment and organises the take-back scheme for e-waste collection. ASEKOL operates in 4 countries - CZ, SK, PL and DE. We fulfil all legal obligations for our clients including ESG reporting.	ZEOS company, Slovenian Producer Responsibility Organization
2	Česká zbrojovka a.s.	Defence industry	Ceska zbrojovka a.s. (CZ) is a Czech manufacturer of precision-engineered military and commercial firearms that are exported to more than 100 countries around the world. CZ is a proud partner of many domestic and international armed forces, with an extensive portfolio of high-performance military firearms that deliver rock-solid reliability. Its range includes striker-fired/hammer-fired service pistols, sub guns, select fire rifles, sniper rifles and grenade launchers.	Representatives of the procurement departments of the Ministry of Defence and the Ministry of the Interior and Public Administration

3	Drone Testing Polygon a.s	Drone testing/training site (emergency services)	Drone test polygon will function as an open innovation platform connecting the state sector, industry and academia. Cooperation with the defence industry will enable the implementation of joint research projects and the certification of new technologies. Polygon will provide an environment for testing prototypes and accelerate their implementation into practice. Cooperation with universities will be focused on research on autonomous navigation, artificial intelligence and swarm systems. Academic institutions will have the opportunity to use the polygon as an experimental research facility and at the same time prepare experts for the security sector. The dynamic development of unmanned aerial systems (UAVs) and anti-aerial vehicles (C-UAS) technologies is fundamentally changing the nature of modern military operations, crisis management and critical infrastructure protection. The increasing use of drones in the military field, firefighting operations, search operations, disaster monitoring and security operations creates a need for specialized infrastructure for testing, training and certification.	clients
4	GRYF HB, spol. s r.o.	R&D, measurement & control	Founded in 1990, GRYF HB develops and manufactures electronic measuring instruments, gas analysers, and industrial water quality sensors. We supply OEM partners and integrators in PSA gas generation, aquaculture, environmental monitoring, and healthcare. Operating strictly in-house from R&D to final production, we ensure high European quality, reliability, and custom engineering.	Distributors, partners (integrators), research cooperation

5	CHEVAK Cheb, a.s.	Water utilities / water sector	CHEVAK Cheb, a.s., founded in 1994 and based in Cheb, Czech Republic, is a regional water utility supplying drinking water and treating wastewater for about 85,000 residents in the Cheb district, including Cheb, Aš and Mariánské Lázně. It also operates an accredited laboratory, septic and sludge transport, and solar sludge dryers that reduce disposal costs and environmental impact.	Partners for knowledge and best practices exchange.
6	IceWarp Technology s.r.o.	IT	As Head of Presales at IceWarp, I lead technical and business support for international sales activities, working with customers, partners, enterprises and public-sector organizations. I am responsible for solution design, technical consultations, product demonstrations, proof-of-concept projects and complex deployments, helping organizations evaluate IceWarp as a secure communication and collaboration platform.	Co-operations, Partners
7	Kovobel, v.d.	Engineering & logistics	Kovobel, v.d. is a Czech manufacturer founded in 1966, producing demountable steel storage containers and poultry breeding equipment. Our flat-pack containers ship folded, reducing transport costs, and can be assembled on site without a crane. Design, production and delivery are handled in-house. We export more than 75% of our production worldwide. We are looking for distributors and importers of our storage containers and offer reliable long-term partnership.	Direct distributors of demountable storage containers

8	Law Office PETERKA & PARTNERS - Slovenian Branch	Legal services / law firm	Fully integrated Czech law firm with 26 years of experience. We operate 11 fully owned offices in 10 countries across CEE (incl. CZ, PL, SK, HU, RO, BG, HR, SI, AT, UA). We provide one primary contact and one coordinating partner for cross-border matters, with a unified fee approach for the region. Member of TerraLex®, ILN, Globaladvocaten and Eurojuris.	We are a Czech law firm with a presence in Slovenia. We look forward to meeting companies from the Czech Republic that may benefit from our legal services in Slovenia and beyond.
9	Litostroj Group a.s.	Hydropower & heavy engineering	Litostroj is an international engineering group specializing in hydropower technology and heavy machinery. The company designs, manufactures, modernizes and services hydraulic turbines and related equipment for hydropower plants, including pumped-storage facilities. With extensive engineering expertise and a global track record, Litostroj provides comprehensive solutions for the energy sector, supporting the modernization, efficiency and long-term reliability of hydropower infrastructure.	Exploring investment conditions and opportunities for further development and expansion in Slovenia, including investment incentives, financing options and potential cooperation with relevant public institutions and local business partners.
10	S.ICZ a.s. , https://www.iczgroup.com/	IT / cryptography (development & manufacturing)	S.ICZ a.s. develops HW cryptographic devices for classified information systems. Also provides professional services over a wide range of activities that include security management. It performs risk analyses, designs security policies, performs assessment. S.ICZ supplies solutions to secure virtualization, servers, workstations, mobile devices and SW in connection with directory services, with a safe communication infrastructure, and with identity management and access management solutions.	Co-operation

11	Sedlecký kaolin a.s.	Mining & mineral processing	Sedlecký kaolin is a Czech producer of high-quality kaolin and related industrial mineral raw materials for ceramics, porcelain, sanitaryware, paper, coatings and other applications. We seek customers, distributors and strategic partners in Slovenia and the Adriatic region, as well as logistics providers for efficient rail and port transport via Koper, including bulk and container shipments.	Customers and distributors of kaolin and industrial mineral raw materials, especially for ceramic tiles, sanitaryware, porcelain, tableware, technical ceramics, paints, coatings and related industries. We are also looking for logistics and transport partners experienced in rail freight, bulk and container handling, port operations and inland transport via the Port of Koper, including connections between production sites, rail terminals and Adriatic markets.
12	Viessmann, spol. s r.o.	Energy & building services (HVAC, heat pumps, renewables)	Viessmann, part of Carrier Global Corporation, provides integrated heating, cooling and renewable energy solutions for residential, commercial and industrial buildings. Our portfolio includes heat pumps, boilers and digital services that improve energy efficiency and comfort. We seek cooperation with developers, investors, engineering firms, installers and distributors on sustainable building and energy projects.	Clients
13	Vysoké učení technické v Brně	Science, research & development	Central European Institute of Technology (CEITEC), Brno University of Technology (VUT / BUT), is a leading R&D centre focusing on advanced materials, nanotechnologies and life sciences, and fosters collaboration with industry and international partners.	Co-operation primarily in the frame of European R&D projects.

14	ZHT Group s.r.o.	Manufacturing and Supply for the Integrated Rescue System (IZS)	ZHT Group is a Czech manufacturer of innovative firefighting and rescue solutions. We design and manufacture special-purpose vehicles, modular superstructures, firefighting trailers and rescue modules for ATVs. Our solutions are used by emergency services, police, national parks, forest services and other organizations. With our own development and production in the Czech Republic, we deliver reliable, lightweight and highly customizable solutions worldwide.	We are looking for distributors, potential customers and strategic partners interested in bringing innovative Czech-made solutions to their local markets. We seek cooperation with companies, public institutions and organizations in the fields of firefighting, rescue services, police and municipal security, national parks, forestry and wildfire prevention. We believe that solutions designed to help protect lives, property and the environment should be available beyond the Czech Republic. Therefore, we are looking for strong local partners who can help us introduce, promote and establish our technologies in international markets while building a stable and long-term business partnership.
15	Czech Chamber of Commerce	Business Association
