

Krško, 23. 2. 2024

INVITATION

Opportunities for Participation in the International Supply Chain for the Construction and Maintenance of Nuclear Power Plants

on March 6 and 7, 2024,
at GEN energija d.o.o. HQ,
Vrbina 17, 8270 Krško.

Esteemed invitees,

The European Union faces the dual challenges of bolstering energy security while also achieving carbon neutrality goals by 2050. During the recent energy crisis, the EU acutely experienced the challenges of ensuring a stable and affordable supply of power, which is essential for economic growth. There is widespread recognition that these challenges could not be addressed without relying on nuclear energy. As a result, the EU and the United Kingdom are moving forward with the construction of over ten nuclear power plants, one of which is the second reactor project at the Krško Nuclear Power Plant. Additionally, several other countries around the world are reviewing plans to construct an additional 35 nuclear power plants. **This event will present you with the opportunity to learn how your company could become a part of Westinghouse's regional and global supply chain.**
