

Barbara Blaznik, Diana Gregor Svetec, Sabina Bračko

*Chair of Information and Graphic Arts Technology, Faculty of Natural Sciences and Engineering,
University of Ljubljana, Snežniška 5, SI-1000 Ljubljana, Slovenia*

Effect of temperature on some optical and surface properties of the archival, synthetic and special papers

*Vpliv temperature na nekatere optične in površinske lastnosti
arhivskih, sintetičnih in specialnih papirjev*

You are cordially invited to attend poster presentations ...

**three
paper grades**

- archival
- synthetic
- special

methods

- light fastness
 - $\lambda > 320 \text{ nm}$
 - $T = 35 \text{ or } 60^\circ\text{C}$
 - $\text{RH} = 35\%$
- dry heat treatment
 - $T = 105 \text{ or } 130^\circ\text{C}$

evaluation

- optical properties
- surface properties

results
