

Beijing Changfeng IT Industry Alliance

Changfeng Alliance was established in 2005, is the first batch of pilot industrial technology innovation alliances of the Ministry of Science and Technology. It was jointly identified as the first batch of grade A industrial technology innovation alliances by the Ministry of Science and Technology and six other commissions. Changfeng Alliance brings together the best industrial resources in the country, gives full play to the innovative service chain mechanism of production, education and research, focusing on standard development and promotion, project consulting, internationalization, talents, training, regional cooperation and docking, new technology and new product promotion, etc. to carry out services. Currently, Changfeng Alliance has over 300 members. Member companies cover core basic software and hardware, application software, Artificial Intelligence, Big Data, Cloud Computing, Internet of Things, Smart Cities, Internet and Innovation and Entrepreneurship institutions.

These attracted YonYou, Kingsoft, Taiji, iSoftStone, Lanxum, Thunisoft and two-thirds of the domestic leading enterprises in basic software products and application, covering all aspects of the software and information service industry chain.

The rich industrial resources of Changfeng Alliance provides solid industrial support for the services of Changfeng Hope-rising Space.
