ENTRECOMPFOOD QUESTIONNAIRE FOR STUDENTS

Reflection on acquired entrepreneurial competencies

The questions bellow are related to the development of your entrepreneurial competencies.

Think about the knowledge and competencies that you have used or developed in the course on the subject of _____ and choose the one you most identify with. In addition to the statements, descriptions are added to make it easier to understand each statement. You can only select one statement.

If you do not identify with any of the statements, select the answer "None of the above".

For each competency, you also have the option to write an example / event that explains your definition under a particular statement.

The results will be pooled and anonymized and used for evaluation within the EntreComp competencies.

The results will also be sent to your email address. We suggest that you save the results and continue to upgrade your competencies and re-evaluate yourself over time.

There are no wrong answers.

Entrepreneurship
Competence

1. **CREATIVITY: Developing creative and goal-oriented ideas.**

Choose the most appropriate statement *

- I know how to create new ideas or solutions for existing needs.
- I can use different techniques to create new ideas (ICT, brainstorming, mind maps, …).
- I know how to involve co-workers in creating new ideas, researching, and testing.
- I know how to design and implement the process of generating and validating ideas (for example, leading a meeting where we create new ideas using different techniques with colleagues/coworkers).
- None of the above.

Justify the above answer with a brief description of the case

2. **SPOTTING OPPORTUNITIES: Discovering and identifying opportunities to create value.**

Choose the most appropriate statement *

- I recognize opportunities and needs, for example, I recognize the possibility of improving a particular product.
- I can analyze needs in different contexts and identify opportunities, for example, I analyze the composition of a particular product and identify the opportunity to improve it for different target groups.
- I strive to improve solutions and established procedures, for example to improve a particular technological process.
- I design and implement the process of generating ideas (for example, meeting with colleagues using various techniques - brainstorming, mind maps,…), which will create added value or upgrade solutions to the identified problem.
- None of the above.

Justify the above answer with a brief description of the case

3. VISION: Striving to realize your vision of the future.

Choose the most appropriate statement *

- I imagine the future using different scenarios of the course of events. For example, if I finish a year with a good average grade, It will be easier for me to get a job.
- I develop my vision of the future for a particular project and work out different possible outcome scenarios. For example, I want to get a job in a high-tech food company, if I gain experience with various projects in this field during my studies and gain the appropriate competencies, I will have a greater chance of employment.
- I analyze the context, build my strategic vision and identify different ways to implement it. For example, in the current market situation, food companies do not hire, I want to get a job in a high-tech food company, so I will have to gain very good experience and prove in my knowledge that they will want to have me in their ranks. I will take part in various competitions, gain experience with an internship in a similar company abroad, etc.…
- I can convince others of my choice between different scenarios in a changing context, such as convincing my colleagues to take part in the Ecotrophelia competition, as this will gain them the competencies and experience that will make them better employable later on.
- None of the above.

Justify the above answer with a brief description of the case

4. ETHICAL AND SUSTAINABLE THINKING: Assessing the consequences and impacts of ideas, opportunities, and actions.

Choose the most appropriate statement *

- I can say that I respect the environment and society.
- Whenever I decide on a solution, I wonder about the ethical and sustainable consequences.
- I can analyze the ethical and sustainable consequences of proposed solutions, such as how the use of a particular raw material affects the environment and society.
- Using various methods to analyze the sustainable and ethical aspects of our project (environmental and social impact), I can suggest solutions and improvements.
- None of the above.

Justify the above answer with a brief description of the case

5. **MOBILIZING RESOURCES: Collection and management of tangible, intangible and digital resources that we need to carry out a particular idea/project.**

Choose the most appropriate statement *

- I can easily find additional resources and contacts for a specific project, such as solving my tasks in the pedagogical process (preparation of a seminar).
- For a specific project, such as solving my tasks in the pedagogical process (preparation of seminars), I regularly use different sources and networks of contacts.
- I know how to effectively use different resources to achieve the best possible result in a project (preparation of a seminar), for example who to turn to for help with legislation and how to get the most useful answer.
- I can use the available resources (professional help, literature, links with companies) and determine the necessary resources (financial and material) to carry out a particular project (for example, product development in the framework of the Ecotrophelia competition).
- None of the above.

Justify the above answer with a brief description of the case

6. **WORKING WITH OTHERS: Networking, collaboration and networking.**

Choose the most appropriate statement *

- Working in a team is not a problem for me.
- I also participate in project work with peers outside of lectures.
- I know how to lead a team and work with remote communities.
- With the help of various tools and methods, I can create a space to promote the work of my team (for example, using tools for collaborative work - Moodle, MS Teams, Google Docs or live with various methods and incentives/motivation).
- None of the above.

Justify the above answer with a brief description of the case

7. **MOTIVATION AND PERSEVERANCE: Stay focused and persevere.**

Choose the most appropriate statement *

- I am driven by challenges and do not give up quickly.
- I know how to set goals, measure my progress and overcome obstacles that I encounter on the way to my goal.
- Even when faced with adversity, I insist on achieving my goals.
- I adapt to failures and failures and know how to motivate others.

Justify the above answer with a brief description of the case

8. LEARNING THROUGH EXPERIENCE: Learning through activities.

Choose the most appropriate statement *

- I have a desire to gain individual experience (reading a book, attending a workshop, imitating, watching recordings, ().
- I know very well what my limitations are and in which area I still have to upgrade my competencies.
- I am not afraid of mistakes but I use them to learn and improve.
- I recognize when I am successful and if I am not, I adjust my vision, goals and action plan accordingly.
- None of the above.

Justify the above answer with a brief description of the case

You answered all the questions
Thank you for reflecting on your work and your time.
