

- Applying EntreComp to attract young people
to the 1st European manufacturing sector: the agri-food industry -

NEWSLETTER FOR EDUCATORS

December 2022

Being entrepreneur is not a talent, it is a competence you can learn.

The JRC - Joint Research Centre, on behalf of DG Employment, Social Affairs and Inclusion, has developed a definition of entrepreneurship as a competence and a reference framework describing it, the Entrepreneurship Competence Framework (EntreComp). It aims to provide evidence-based scientific support to the European policy-making process. The development of the entrepreneurial capacity of European citizens and organizations is one of the key policy objectives for the EU and Member States. The European Commission identified sense of initiative and entrepreneurship as one of the 8 key competences necessary for a knowledge-based society.

The framework can be used as a basis for the development of curricula and learning activities fostering entrepreneurship as a competence. [Learn more.](#)

Measure yours or students development of entrepreneurship competences

The [questionnaire](#) for students on Entrepreneurial competences modified by EntreCompFood project offers to measure the development of entrepreneurial skills, which can be used by teachers and professors when mapping students' level of competencies. At first, students should self-assess using the proposed questionnaire. The results should give the professor what competencies could be strengthened so proposed activities could be tailored for the development of the latter. Measurements can be done during the time of the university course. It is suggested a final measure at the end of the university course, or when a project is delivered, for example, so the evolution of the competencies can be perceived by the professor and the students. During the first session of the conference the approach of EntreCompFood project to boost entrepreneurship competences in agri-food sector will be presented; in the second session different actors of European Food System will present initiatives important for innovation in Agri-Food sector.

Become a mentor to a Ecotrophelia team

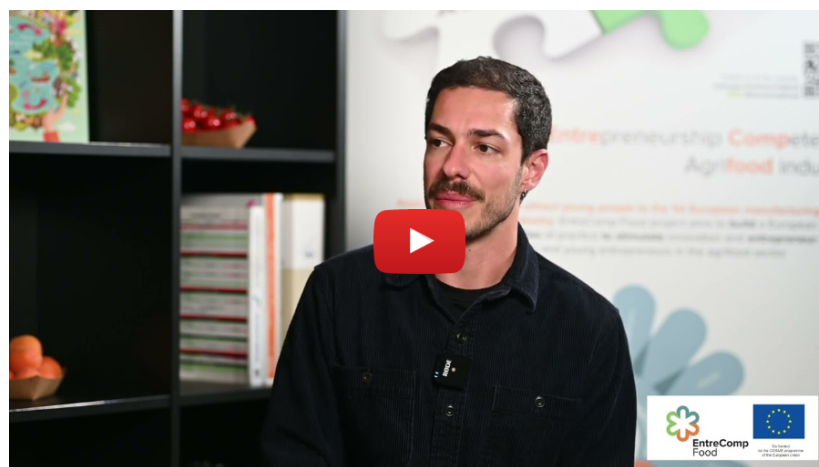

Ecotrophelia is an excellent project-based opportunity to strengthen student entrepreneurial competences due to team work, learning by doing and to turn their creative ideas into food products with added value. When creating foods students are thinking about the impact on the planet and human health. With this entrepreneurial award we are supporting the entire of Ecotrophelia food product into the market. You can watch more [students testimonials](#) about their experience with Ecotrophelia.

With collaboration with EIT Food we offer the students to freely access the Inspire4Ecotrophelia training. The training is a 12 hours on-line course on entrepreneurship competences (business plan, etc). Learn more about it on January 19, from 2:00 pm to 4:00 pm CET. [Registration link.](#)
