

Musculoskeletal disorders in the European construction industry

Simultaneous interpretation in:
English, Slovenian, French, German, Italian and Spanish
The conference will be a virtual event

9 February 2022, from 13:30 to 16:30

AGENDA

Despite the overall reduction in the number of work-related accidents and illnesses, statistics clearly indicate that construction is still among the sectors needing further improvement.

At this e-workshop, FIEC and EFBWW will examine recent developments on MSDs in the EU. Representatives from different Member States will share their perspective and best practices while dealing with Musculo-skeletal disorders.
