About PEDMEDE

Panhellenic Association of Engineers Contractors of Public Works (PEDMEDE) is an Employer's Organization **representing the construction sector in Greece, est. in 1935.**

PEDMEDE covers all range of companies dealing with the construction of public works.

Our **members are both** individuals, contractors of public works, SMEs and also technical companies from grade A1 up to grade 7 (the upper grade), according to the existing classification of contractors of public works, provided by the Greek Ministry of Infrastructure and Transport.

Our **network is expanding all over the country**, operating 15 regional departments that cover all Greek regions, with our central premises being established in Athens. Additionally, we operate a specific section of Construction Companies

Our Impact

With **strong membership capacity, more than 2.500 registered entities**, we **expand our impact**, being the key stakeholder of the construction sector in Greece.

Our **core scope is to ensure and promote our members' interests** and welfare are both in national, regional and European level.

Within this direction, we are **in close cooperation with public authorities, government representatives and other key stakeholders** representing the construction sector.

We feel proud to form polices and initiatives dealing with the construction sector, to shape the national legislative framework along with National Public Authorities and to have a leading role in social dialogue.

European representation

We are the **sole Greek Construction Association representing the country in Europe.**

In particular:

- **statutory member of FIEC** (European Construction Industry Federation) **and EIC** (European International Contractors), holding seats in the Steering Committees of both entities.
- Our current President, Mr. Michail Daktylidis, holds the position of FIEC's Vice - President since 2016. He is also President of ECF (European Construction Forum) that recently launched the new initiative “Construction 2050 – Building tomorrow’s Europe today” and the alliance Construction 2050.
- Recently joined the **EDA** Association (European Demolition Association)

Our services & our expertise

Key services we provide are inter alia the following:

- ✓ Represent the Greek perspective of the Construction Industry
- ✓ Law and tax consultancy through our legal department
- ✓ Information and support concerning bids and procedures relevant to Public Works
- ✓ Promote education and lifelong learning
- ✓ Implementation of National and EU projects in the areas of our interest
- ✓ Facilitate labor market integration
- ✓ Social Dialogue with key stakeholders (social partners, public authorities)

Our NSRF project as a best practice

Training and Certification of Employees in the Construction and Materials Industry

The project aims to develop professional capacity of construction professionals through the provision of training and certification in the areas of:

- BIM
- Electronic Procurement for Public bids.

Budget: 1,5 million

Funded by the European Social Fund (ESF) and part of the Operational Program Competitiveness Entrepreneurship and Innovation 2014-2020.

Our role: Unique beneficiaries

Our NSRF project as a best practice

Training and Certification of Employees in the Construction and Materials Industry

More than **1,200 trainees**, **from all over Greece**, approached and engaged via numerous activities such as:

- Info Days
- Posts in local newspapers
- Social Media Campaigns

Our projects

Co-funded by the
Erasmus+ Programme
of the European Union

All. Construction. Skills Blueprint for the Construction Industry

Blueprint for the Construction Industry gathers three European Union (EU) umbrella sectorial organizations, along with nine national sectorial representatives and twelve Vocational and Education Training providers (24 partners) from twelve EU countries to work together for developing a new sectorial strategic approach to cooperate on skills in the construction industry and support a better matching between skill needs of companies and skills provided by training centers.

Our projects

Co-funded by the
Erasmus+ Programme
of the European Union

CDWaste-ManageVET- Developing VET for addressing Construction and Demolition Waste Management skills needs

CDWaste-ManageVET objective is to promote VET for employees on construction sector by addressing modern training needs in accordance with EU priorities regarding current CDW management rules and circular economy.

The project's Consortia consists of 7 partners coming from 6 EU countries (France, Portugal, Italy, Spain, Greece, Romania).

Our projects

Co-funded by the
Erasmus+ Programme
of the European Union

BUNG- Developing nearly zero energy building skills through game-based learning

The BUNG project aims at delivering knowledge, developing zero energy building skills and encouraging energy efficient behavior amongst building professionals through the development of an nZEB (nearly Zero Energy Building) learning game (BUNG game) that maximizes the learning effect of individuals, as well by introducing innovative pedagogies and learning approaches.

BUNG

Our projects

Co-funded by the
Erasmus+ Programme
of the European Union

CCP_Law- Curricula development on Climate Change Policy and Law

CCP_Law project will develop, test and adapt a postgraduate degree in the field of Law addressing the special priority of Climate Change law.

The multidisciplinary educational program targets graduates from the following schools: environmental sciences, social-scientific environmental studies, natural sciences or environmental engineering, or an appropriate field in social science or law.

Implementing partners from Asian Universities: Malaysia, India & Vietnam

Implementing partners from Europe: Spain, Greece & the UK

Our projects

Co-funded by the
Erasmus+ Programme
of the European Union

TAB4BUILDING- Training for Architects and Builders in the use of composites
For the BUILDING sector

TAB4BUILDING aims at increasing the technical, quality control and management skills about composites materials and create sustainable networks for increasing the collaboration and learning within Composite Sector.
