Maintenance and safety of bridges in Europe A lever for the ecological transition

Brussels, Friday 3rd June 2022, 9 am to 6pm

Hôtel Le Plaza, Adolphe Maxlaan 118/126, Bruxelles

This unprecedented event aims at highlighting the issue of the maintenance of engineering structures in the context of ecological transition ("Green Deal"), with respect for the environment and the need to reduce the carbon footprint.

Around representatives of the European institutions, the construction sector, the administration and NGOs, this event will be structured around four round tables :

- A round table with high-level European political speakers on the following issue: **A useful and impactful transport policy which is safe and part of the necessary ecological transition: what are the upcoming challenges?**
- A round table focused on the challenges of ecological transition: **The maintenance of engineering structures: an open way for the ecological transition?**
- A round table comparing models relating to the maintenance of engineering structures in several European countries: **Perspectives on the maintenance of engineering structures in Europe. What are the different models?**
- A round table around the intertwining of the challenges of ecological and digital transition: **Digital and ecological transition: two intertwined challenges for maintenance?**

This event will be held in English and in French.
