direktor | CEO

### Področja uporabe izdelkov

#### Fields of use

- živilska industrija | food industry
- avtomobilska industrija | automotive industry
- gradbeništvo | construction industry
- kmetijstvo, vrtnastvo | agriculture, horticulture
- splošna potrošnja | general consumption

### O podjetju

MAAR je nišni ponudnik inovativnih, visoko kakovostnih in okolju prijaznih embalažnih rešitev, ki neprestano vpliva v nadgradnjo lastnega tehnološkega znanja in uporablja sodobne materiale v vseh svojih izdelkih.

### Trgi

MAAR je podjetje s tradicijo, ne le na slovenskem trgu, temveč je prepoznano v globalnem obsegu. Podjetje izvozi kar 90% lastnih izdelkov, predvsem na trge Evropske unije in trge Bližnjega vzhoda.

### Proizvodi

Rezultat nenehnega razvoja so visokokakovostne plastične PE-mreže, mreže za pakiranje sadja in zelenjave, zaščitne mreže za kovinske in druge fine dele, mreže za vrtni program, mesno industrijo, ipd.

### Tehnologije

MAAR je eden izmed redkih ponudnikov obeh obstoječih tehnologij izdelave mrež: ekstrudiranih in pletenih. Zaradi visoke stopnje prilagodljivosti parametrov mreže, kot so dimenzije, elastičnost, barva, teža in material, njihove izdelke odlikujejo visoki higienski in estetski standardi.

### Specialna znanja

Podjetje je v 27 letih delovanja ustvarilo poglobljeno znanje o predelavi plastičnih materialov. Nenehno nadgrajevanje tehnološkega znanja jim omogoča proizvodnjo portfelja unikatnih in visokokakovostnih embalažnih rešitev, ki na trgu izstopajo po svoji dovršenosti.

### About the Company

MAAR is a niche provider of innovative, high-quality and environmentally friendly packaging solutions. They continuously invest in their technological know-how and use advanced components in their products.

### Markets

Company's tradition is recognized not only on the Slovenian market, but globally. MAAR exports approximately 95% of its products, mainly to the EU markets and to countries of the Middle East.

### Products

Result of continuous improvements are high-quality plastic PE nets, nets for packaging fruits and vegetables, protective nets for fine metal parts, nets for gardens, nets for meat industry, etc.

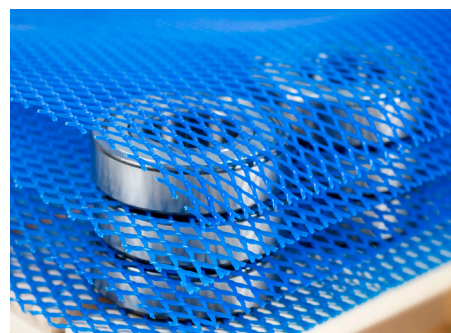

### Technologies

MAAR is one of the few providers of both types of net manufacturing technologies: extruded and knitted. Their highly customised net parameters - such as dimensions, elasticity, colour, weight and material - enable them to design products that achieve excellent hygienic and aesthetic standards.

### Special Skills

In its 27 years of operation the company has acquired a deep understanding of plastics manufacturing. A continual enhancement of its technological know-how has enabled them to produce a range of unique and high-quality packaging solutions, which stand out for their perfection.

### Področja uporabe izdelkov

#### Fields of use

- živilska industrija | food industry
- avtomobilska industrija | automotive industry
- pohištvena industrija | furniture industry
- veterina | veterinary medicine
- gradbeništvo | construction industry
- kmetijstvo, vrtnastvo | agriculture, horticulture
- splošna potrošnja | general consumption

### O podjetju

Roto Slovenija je mednarodno podjetje za proizvodnjo izdelkov iz plastičnih mas in kreiranje profesionalnih rešitev za ekologijo in varovanje okolja.

### Trgi

Roto Slovenija izvažajo svoje izdelke in rešitve v več kot 50 držav sveta.

### Proizvodi

Izdelki z blagovno znamko Roto so glede na področje uporabe razdeljeni v štiri produktne skupine: pisar, izdelki za kmetijstvo, vrtni, športni in ekologijo.

### Technologie

Roto proizvaja več kot 4.000 različnih izdelkov, med katerimi je večina proizvedenih po postopku rotomoldinga, s čimer se uvršča med vodilne proizvajalce plastike v Evropi.

### Specialna znanja

Roto izvaja vse faze poslovnega procesa, od razvoja izdelkov, analize izdelkov, izdelave lastnega orodja, izdelave prototipov, serijske proizvodnje, trženja in prodaje, distribucije ter poprodajnih storitev.

### About the Company

Roto Slovenia is a global manufacturer of high-quality plastic products from polyethylene and a creator of professional environment friendly solutions.

### Markets

Roto Slovenia exports its products and solutions to over 50 countries.

### Products

Roto products are segmented according to their fields of use into four groups; products for agriculture, garden, sport and ecology.

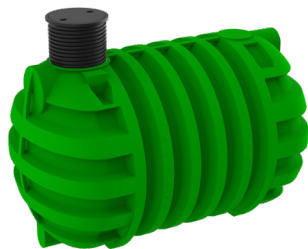

### Technologies

Roto produces more than 4,000 different products, most of which are manufactured by the rotomolding process. This makes Roto one of the leading plastics manufacturers in Europe.

### Special Skills

Roto performs all stages of the business process, from product development, product analysis, own tool production, prototype manufacturing, serial production, marketing & sales, distribution and after sales services.

### Področja uporabe izdelkov

#### Fields of use

- živilska industrija | food industry
- farmacija, medicina | Pharmaceutical industry, medicine
- veterina | veterinary medicine
- elektroindustrija, bela tehnika | electricity industry, domestic appliances
- splošna potrošnja | general consumption

### O podjetju

Mica je okoljsko osveščen proizvajalec trajnostnih embalažnih rešitev. Poslovni model podjetja temelji na celoviti ponudbi storitev – kupcu na enem mestu ponudijo vse od prvih osnutkov do končnega izdelka.

### Trgi

Mica namenja svoje izdelke različnim segmentom industrije, specializirani pa so za dobavo izdelkov kupcem s področja kozmetike, prehranske industrije, kemije oz. orodij, hišne nege ter farmacije.

# PRIMER

### Proizvodi

Mica ponuja širok nabor standardnih oblik plastenk od 10 ml do 5 l, obenem pa tudi razvoj individualnih rešitev, razvitih po meri za doseg največjega učinka na policah.

### Tehnologije

Kupcem ponujajo kakovostne izdelke, izdelane na tehnološko najmodernejših strojih: proizvodnja PET embalaže (do 1 l); proizvodnja embalaže proizvedene iz PE (LDPE, HDPE) ali PP (do 5 l); proizvodnja tehničnih izdelkov, zapork, ipd. s tehnologijo ekstruzijskega pihanja ali injekcijskega brizganja.

### Specialna znanja

Prednost podjetja so znanja iz različnih segmentov proizvodnje embalažnih rešitev, tako da lahko na enem mestu ponudijo celovite rešitve. S tem omogočajo kupcu razvoj kompleksnejših izdelkov. Poleg razvoja individualnih rešitev pa ponujajo tudi širok nabor standardnih oblik in volumnov, ki omogočajo visoko prilagodljivost na trgu.

### About the Company

Mica is environmentally conscious manufacturer of sustainable packaging solutions. Their business model offers customers the complete service in one place – from first draft to the final product.

### Markets

Mica sells its products to customers from various branches of industry, while they specialize in supplying products to partners in cosmetics, food, chemicals and house care, and pharmaceutical industry.

### Products

Mica offers a wide range of standard bottle shapes from 10 ml to 5l, while they also develop tailor-made custom solutions for a maximum shelf impact.

### Technologies

They offer high-quality products manufactured on technologically most advanced machines: PET packaging (volume up to 1 l); packaging made from PE (LDPE, HDPE) or PP (volume up to 5 l); manufacture of technical products, closures, etc. using extrusion or injection molding technology.

### Special Skills

The company's main advantage is their know-how from the different segments of the packaging manufacture, which enables them to offer the complete solution in one place, as well as to develop complex products for their customers. They also provide a wide range of standard shapes and volumes which allow for high flexibility in the market.
