SPIRIT Slovenia
Business Development Agency

With AI4SI (AI for Slovenia) initiative, Slovenia is committed to fostering a responsible, human-centric, and trustworthy AI that respects European values, ethical standards, and human rights.

SLOVENIA: WHERE INNOVATION MEETS OPPORTUNITY

In today's rapidly evolving digital landscape, Slovenia continues to establish itself as a strategic European center for technological advancement. Building on our strong foundation in science, engineering and education, our nation has cultivated an ecosystem where research institutions collaborate with businesses to create practical solutions for tomorrow's challenges.

Slovenia's national AI development program through 2030 has already yielded impressive results, positioning our country as an emerging force in Europe's innovation landscape.

From healthcare innovations to sustainable transportation, digital government services to environmental technologies, Slovenian enterprises are leveraging advanced technologies to deliver meaningful improvements for communities and the environment.

SPIRIT Slovenia Business Development Agency proudly showcases some of Slovenia's technological capabilities at GITEX Europe 2025. We invite you to explore the Slovenia Business stand and connect with these forward-thinking ventures.

Even beyond GITEX Europe 2025, SPIRIT Slovenia Business Development Agency is available to help you navigate the opportunities and connect you with local ICT solution providers from the fields of AI and data science, cloud infrastructure and cybersecurity, industrial automation and other green, creative and smart businesses that contribute to Slovenia being increasingly recognised as a trusted partner that can help you reach your business goals more effectively and efficiently.

Tamara Zajec Balažič
Acting Director, SPIRIT Slovenia Business Development Agency

ICT is more than a sector—it is the strategic pillar that drives competitiveness,, fuels growth, and strengthens the resilience of the entire economy.

BUILDING TOMORROW'S ECONOMY THROUGH ICT EXCELLENCE

Slovenia's ICT sector is a key driver of innovation, powered by a highly skilled workforce and a strong tradition of technological excellence. Slovenian ICT companies are pioneers in the application of advanced digital technologies, particularly in the field of artificial intelligence. The sector provides comprehensive horizontal IT services—AI, cybersecurity, data analytics, telecommunications—as well as vertical solutions tailored for manufacturing, logistics, healthcare, and other industries. This combination enables the Slovenian ICT sector to act as essential partners in the digital transformation of the entire economy, while also supporting the development of public services, education, and society as a whole through smarter, more efficient, and more inclusive digital solutions.

Looking ahead, the next step for the Slovenian ICT sector is to scale its impact globally by strengthening international collaboration, fostering digital innovation, and further supporting the use of AI and other solutions across all sectors. GITEX Europe 2025 offers a unique opportunity for Slovenian companies to showcase their solutions, exchange know-how, and connect with partners to co-create the next generation of digital services.

The ICT Association of Slovenia actively supports this growth through initiatives like ZITex, promoting the internationalization of the ICT sector, AI4SI (AI for Slovenia), advancing responsible AI adoption, and SRIP GoDigital, which fosters cooperation between business, research, and policy for future digital innovations. Together, these platforms reinforce Slovenia's position as a competitive and trusted ICT partner, committed to building a smarter and more connected digital future.

Nenad Šutanovac
Director, ICT Association of Slovenia at the Chamber of Commerce and Industry of Slovenia

ASCALab

Bringing innovative ideas to life and shaping them into value for our partners

ABOUT THE COMPANY

ASCALAB is an agile software development company specializing in development, DevOps and testing services. Our passion for software and QA engineering in combination with a strong human touch towards clients and employees led us to 100+ team members in 4 countries. By focusing on details while being able to see the bigger picture, our highly skilled engineers show their true secret powers, while making sure of professionally executed service, supported by up to date knowledge, skills, years of experience and innovative solutions in timely manner.

PRODUCT/SERVICES

We help our clients achieve their goals with the help of custom software solutions from simple customizations to full-cycle software development. We offer services in the area of backend and frontend development, cloud / DevOps, e-comm, mobile development, QA, embedded systems and business intelligence, while our engineers can contribute as team extension, dedicated team or simply helping out with setting up missing processes.
TARGET PARTNER

- Companies needing software development and/or testing automation
- Start-ups, SMEs, scale ups to enterprise, enterprise IT departments
- Various industries (telecom, energy, healthcare, insurance etc.)
- Companies seeking long-term tech partners

Supercharge hiring with automated social media job marketing

JobBit

ABOUT THE COMPANY

Jobbit is an AI-powered recruitment marketing platform that helps companies attract top talent by running automated, high-performing job campaigns on social media. Unlike job boards, Jobbit targets passive candidates—70% of the labor market—and replaces CVs with tailored questionnaires. With over 700 campaigns run and 300+ companies served, Jobbit delivers 5x more applicants at up to 8x lower cost than traditional recruitment agencies.

PRODUCT/SERVICES

- AI-generated social media job ads
- Tailored applicant questionnaires
- Passive candidate targeting
- Automated ad campaign management
- User-friendly ATS platform
- Data-driven performance optimization
- Up to 8x cheaper than HR agencies

Optimizing production, detecting anomalies, improving productivity

ABOUT THE COMPANY

QLECTOR is developing artificial intelligence-based solutions for manufacturing companies, powered by the QLECTOR LEAP Platform. QLECTOR LEAP for intelligent production guiding automatically builds and maintains a data-driven digital twin of the production processes using proven Machine Learning technology, utilized on operational level 10 years ago. It combines a world of production planners, logisticians, production, technology, and management in one unified platform, providing a holistic view of factory operations.

PRODUCT/SERVICES

Qlector LEAP is a SaaS software solution, which helps manufacturing companies guide their production processes. With LEAP the company gets transparency, visibility and realistic prediction of production plan, inventory levels and workforce schedule, so you they optimize it with the help of AI. Realistic predictions are based on Digital Twin of Production process and Material flow.
