

March 2021

From efficient packaging management to sustainable resource management

Corporate presentation Fost Plus

Together good sorting, better recycling

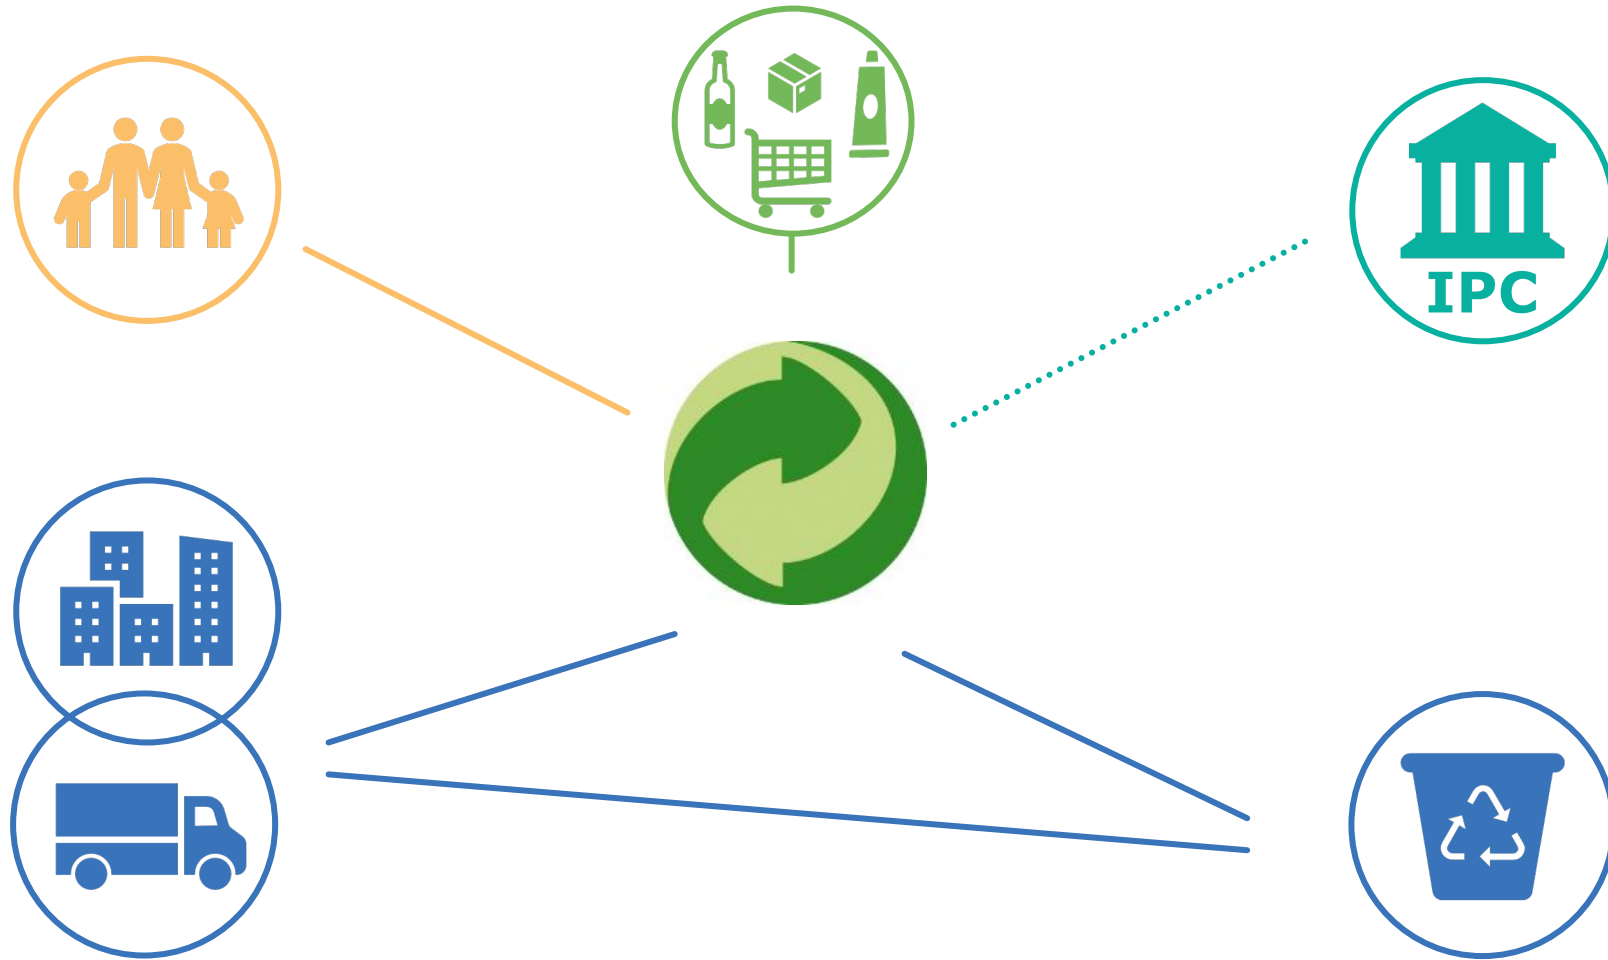

About Fost Plus

Together good sorting, better recycling

Fost Plus, motor of the circular economy

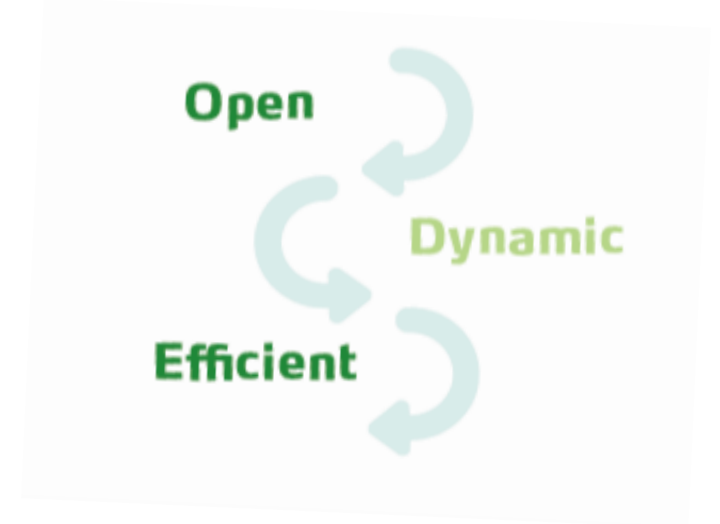

Our ambitions

Fost Plus seeks to offer recycling solutions for **all** household packaging

More tons, a higher recycling rate and more efficient systems

Keeping our core values strong and consistent

Our recipe for success: a uniform recycling scenario

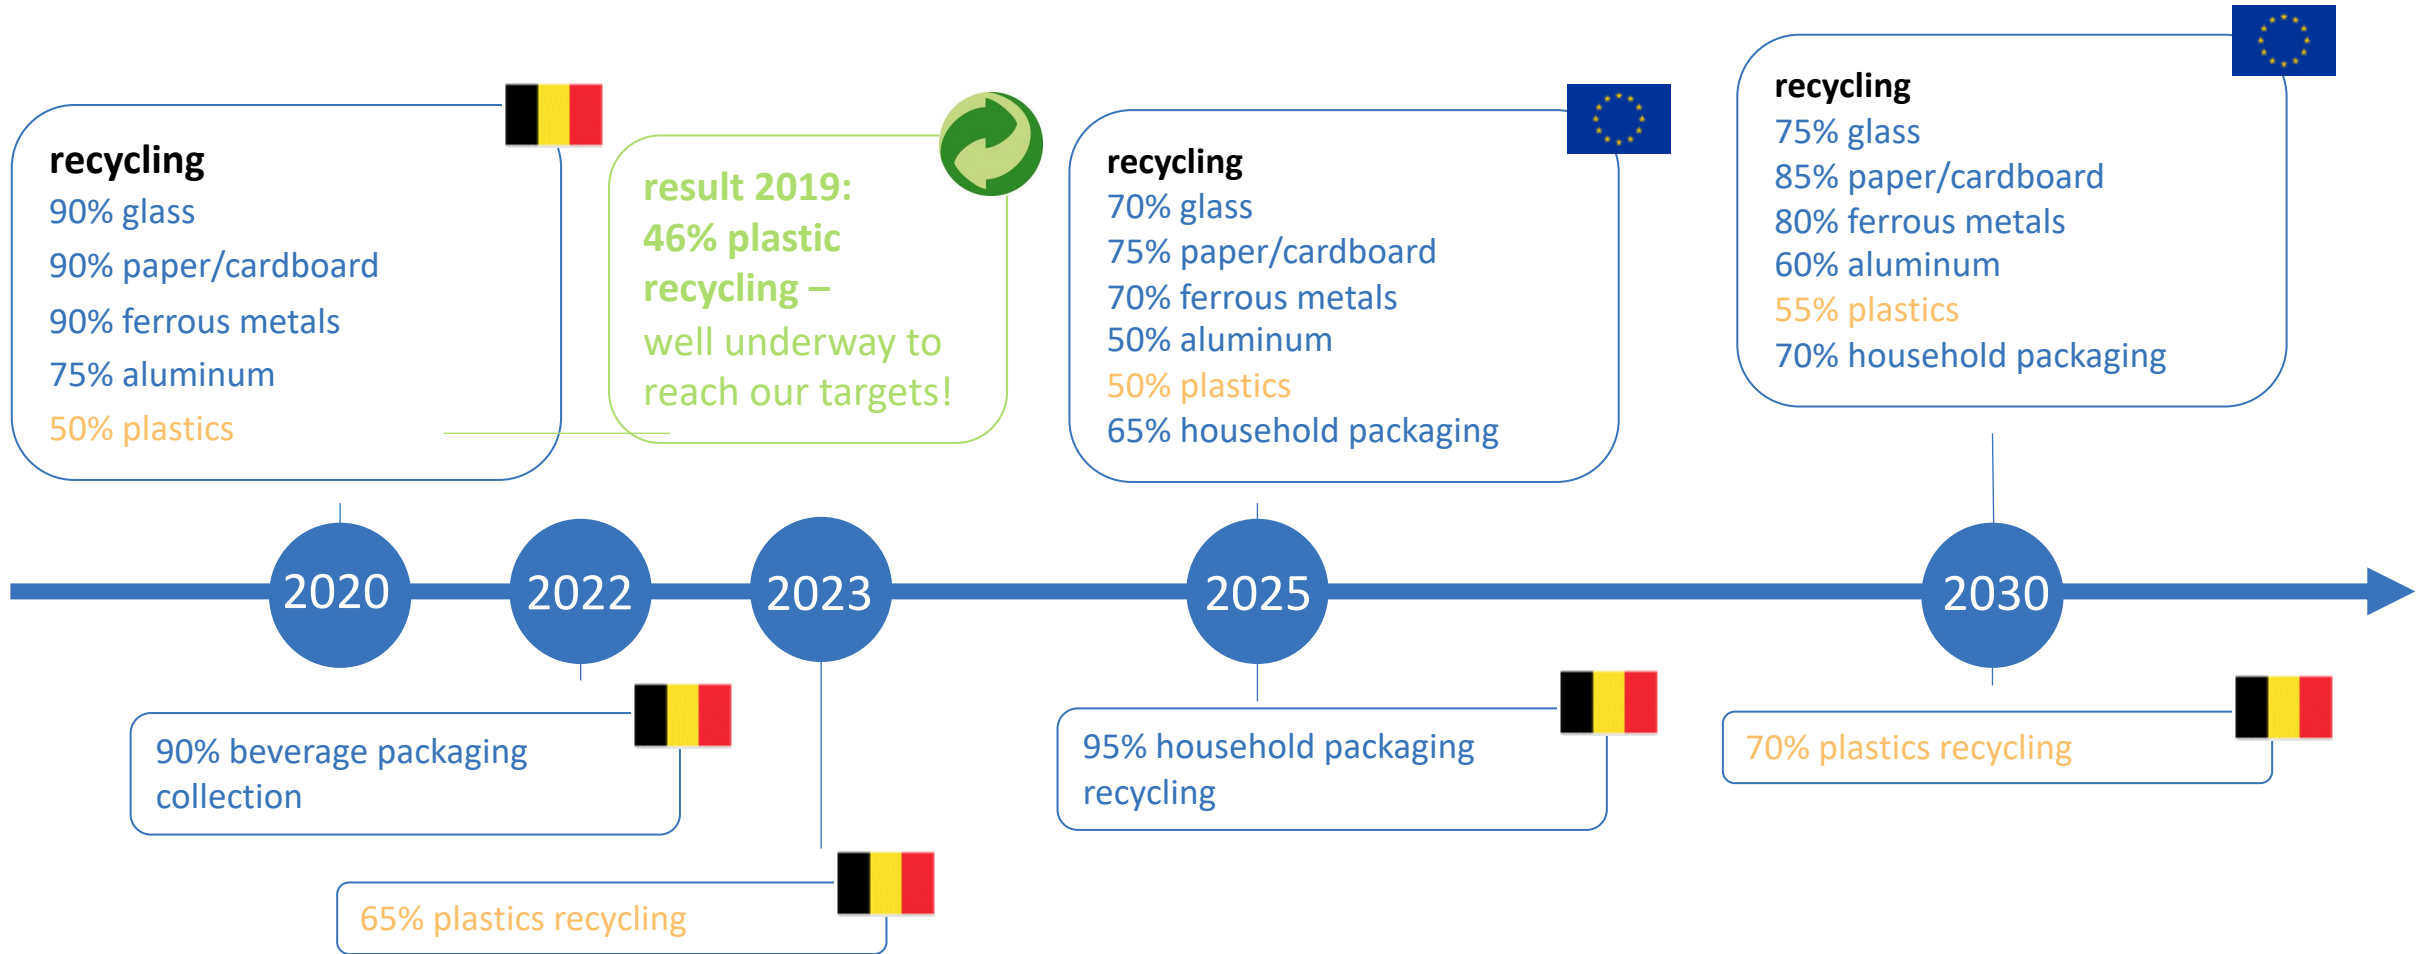

Strong objectives for the future

Together good sorting, better recycling

Fostplus 

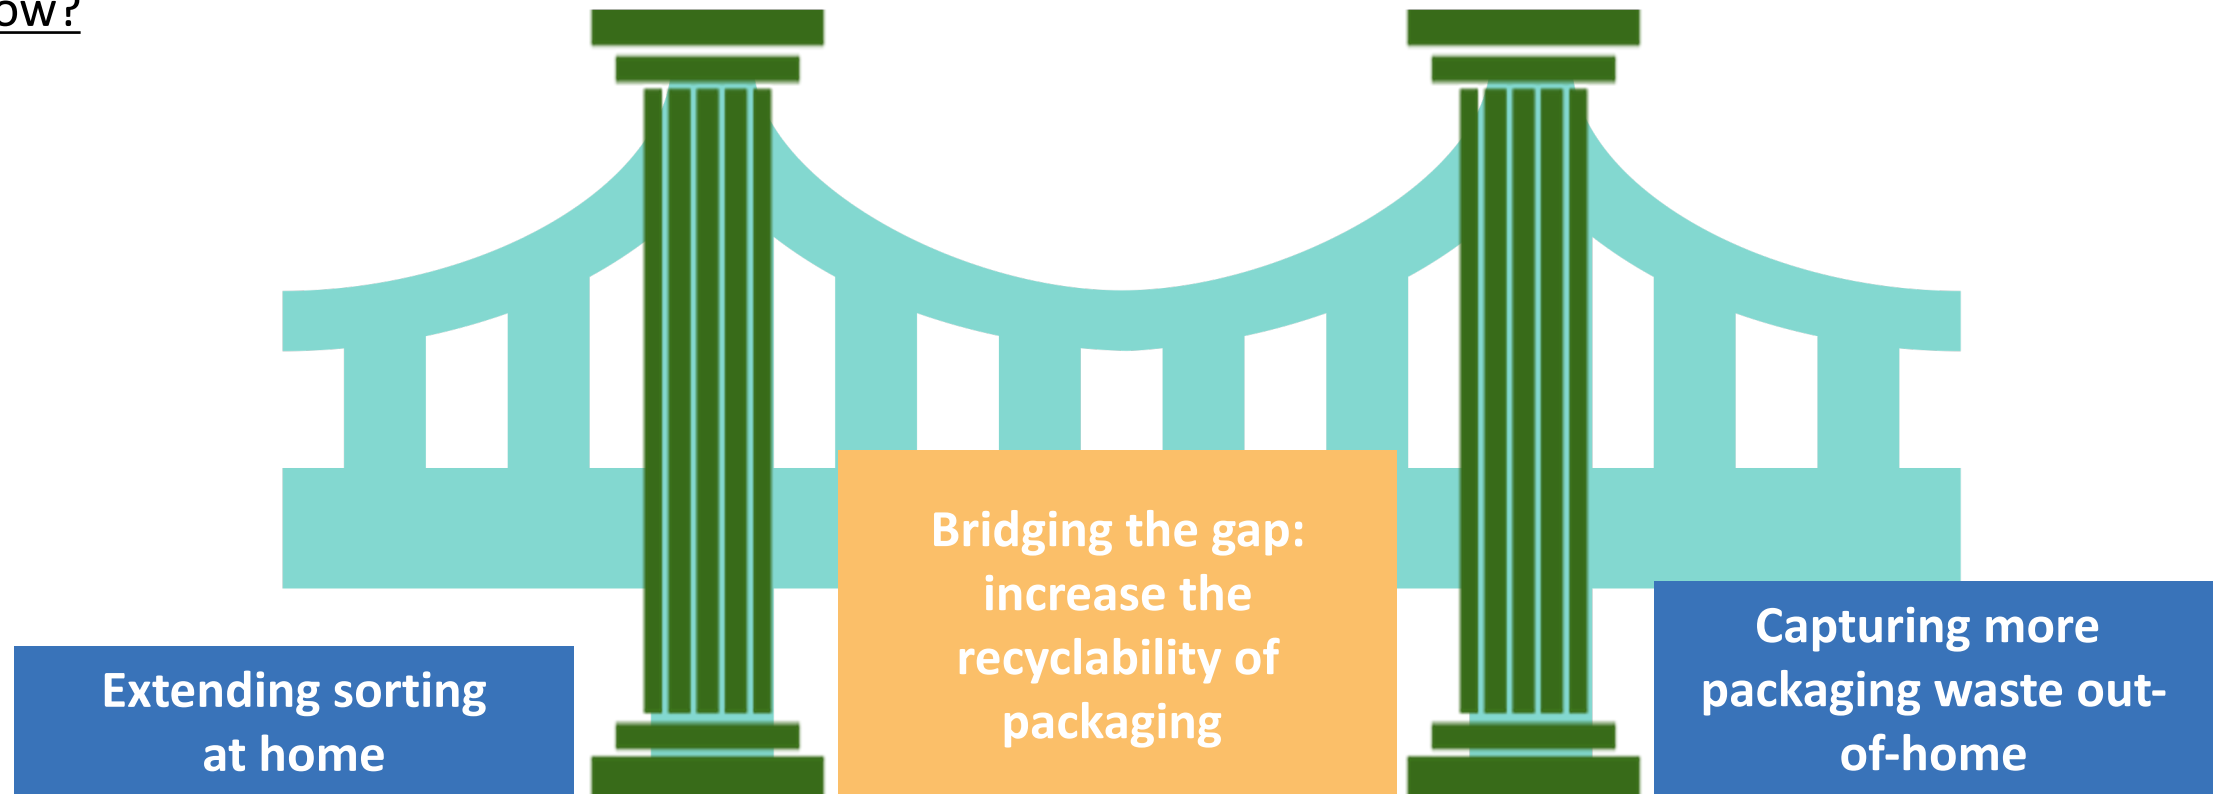

Belgium sets increasingly ambitious recycling targets

A two-pillar approach to reach our goals

Ambition: a recycling solution for **all** household packaging by 2025

How?

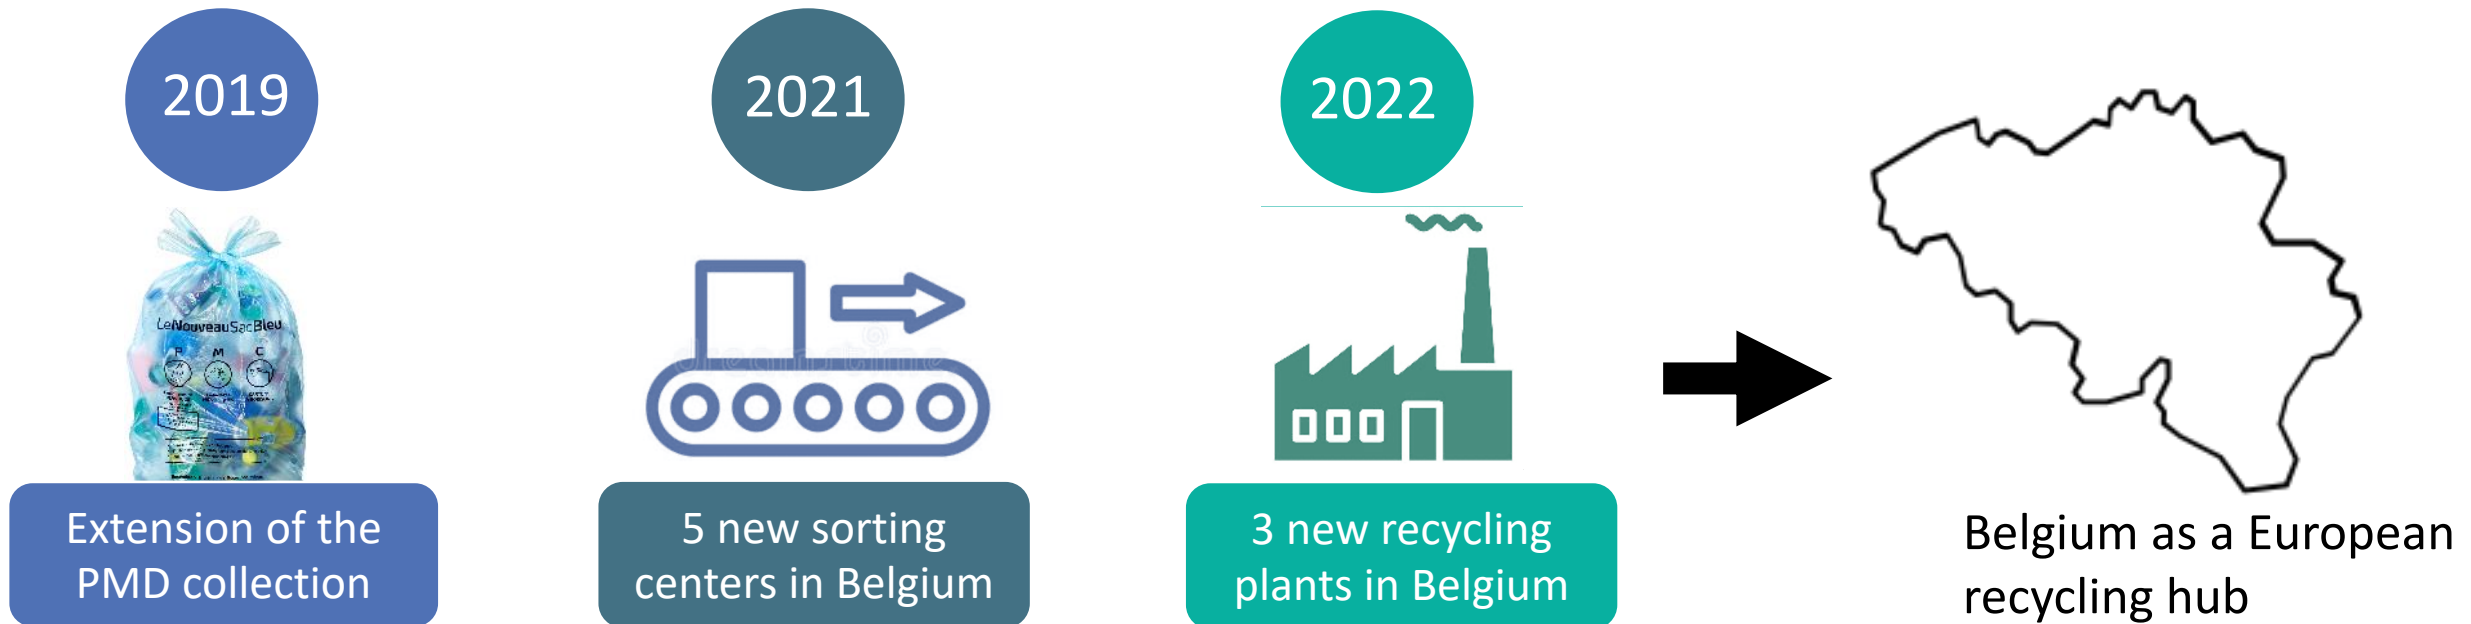

Expanding the Blue Bag to more plastic fractions

- From 160 Ktons to **+250 Ktons**
- Transition phase: 11 ICs & 4.1 million inh. in 2020 to **35 ICs & 11 million inh.**
- Full roll-out **by 2021**

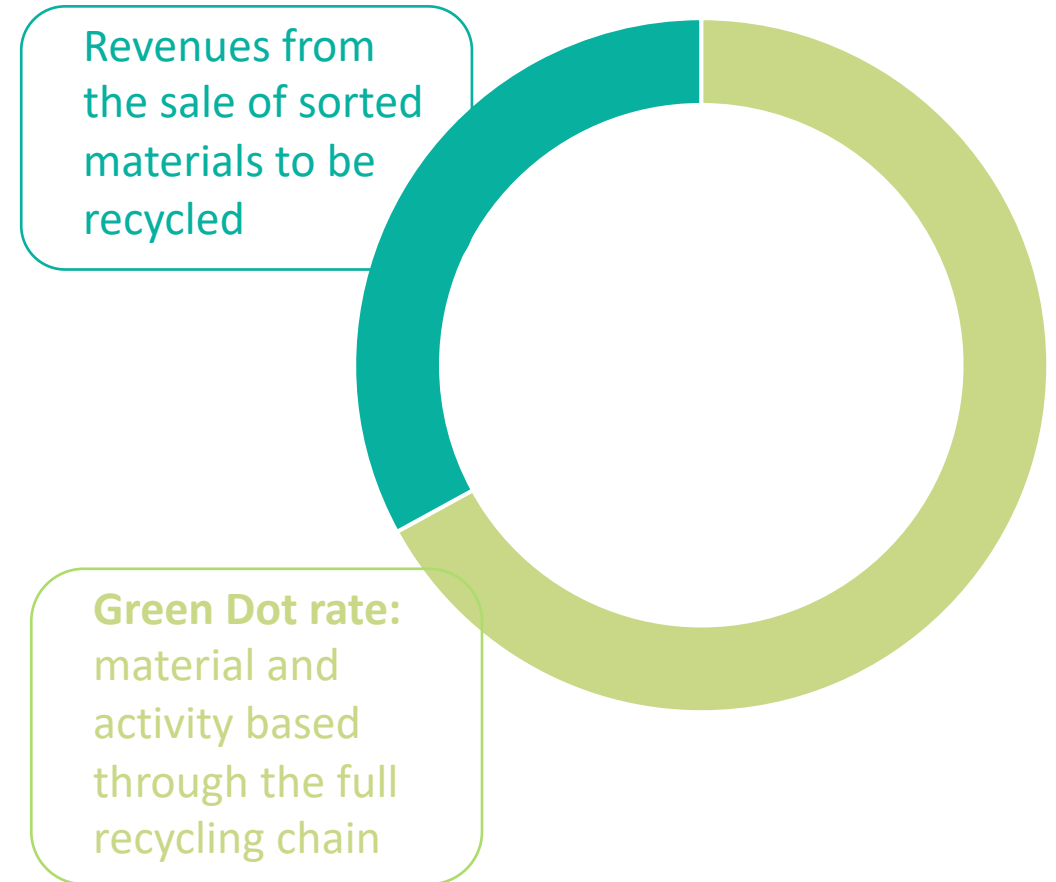

A clearly sequenced plan with a long-term vision

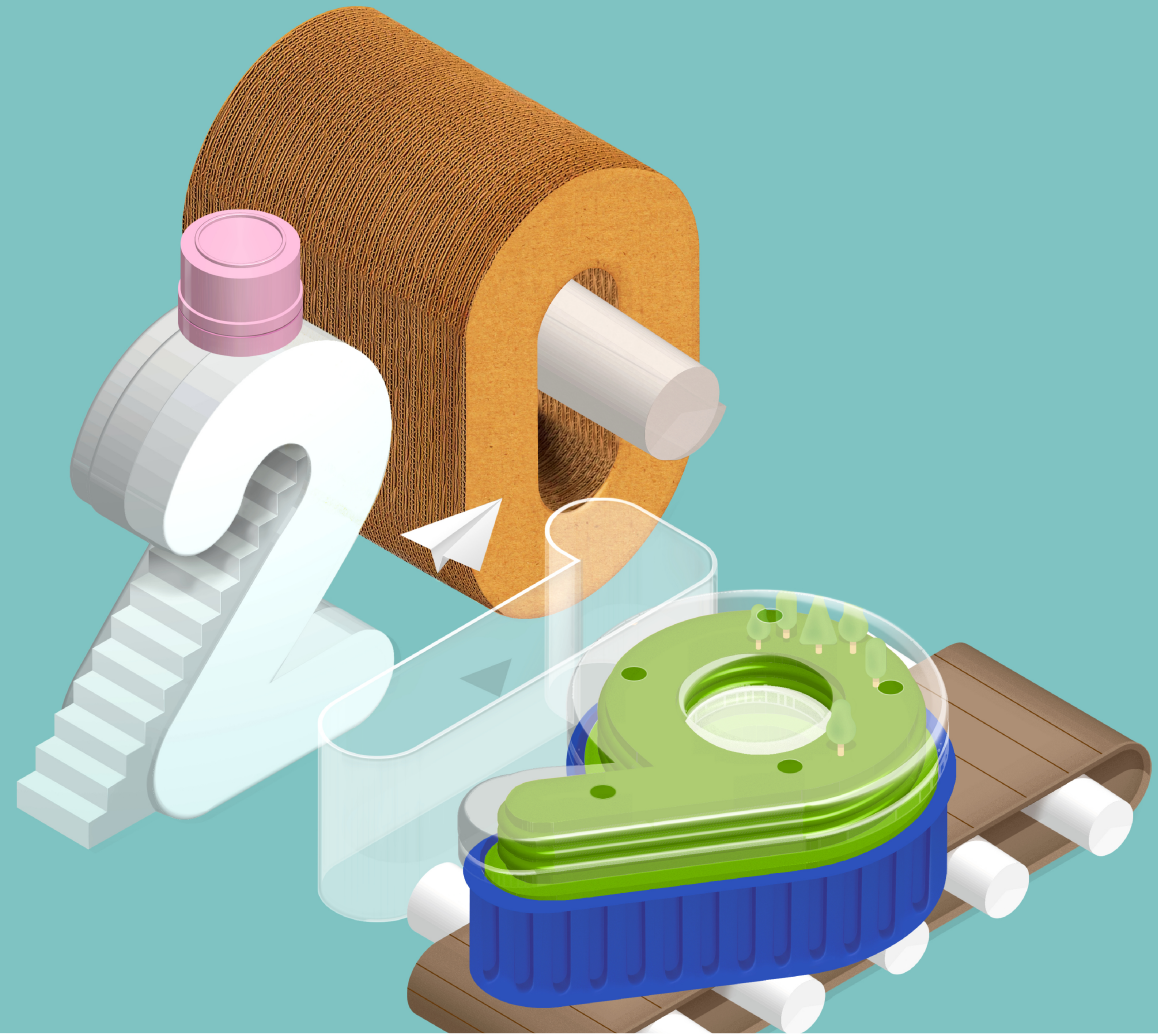

€ Injection of € 700 M
into the local circular economy

Green Dot: eco-modulation based on the circular deficit

- The principle: a strong financial incentive for companies to create packaging that is compatible with existing sorting and recycling scenarios in Belgium
- A unique EPR system in Europe, based on the actual costs of the recycling process

Results 2019

Together good sorting, better recycling

Fostplus 

Total recycling
727.000 ton

92,5 %

of household packaging marketed by members
on the Belgian market

Glass

29 kg

PMD

15 kg

Paper-cardboard

17 kg

11.431.406 Belgians

kerbside collection in

581 municipalities

98 %

of packaging was recycled in Belgium and neighbouring countries

Total cost Fost Plus system

185 million

financed through the sale of materials collected and the contributions of

4.727

member-companies

Net cost of Fost Plus system

Net cost per inhabitant (€/inh)
