GITEX AI EUROPE 2026

Facts about Slovenia

Estimated GDP growth 2025: **1.1 %** (European Commission, May 2026)

Estimated GDP growth for 2026: **1.9 %** (European Commission, May 2026 forecast)

Long-term GDP growth: **2.3%** (European Commission, May 2026 forecast)

Goods exported 2025: **EUR 42,29 billion** (Bank of Slovenia)

Top export partners 2025: **Germany, Croatia, Italy, Austria, France, Poland, Hungary**
(Bank of Slovenia)

Goods imported 2025: **EUR 42,43 billion** (Bank of Slovenia)

Top import partners 2025: **Germany, Italy, Austria, Croatia, China, Hungary, Netherlands, Poland**
(Bank of Slovenia)

9th in international trade (out of 69 economies, IMD 2025)

9th most peaceful country (World Peace Index 2025)

11th in energy security, energy equity and environmental sustainability (World Energy Council, 2024)

19th in the quality of life index (Numbeo, 2026)

21st most developed country (Human Development Index 2023, UN)

22nd in Global Innovation Index (out of 39 economies in Europe, WIPO 2025)

24th most sustainable country (out of 180 countries) (Environmental Performance Index 2024)

26th in education (of 67 countries, IMD 2025)

35th most innovative country (Global Innovation Index 2025)

46th most competitive country (IMD 2025)

SPIRIT Slovenia
Business Development Agency

Slovenia is emerging as a dynamic hub of AI innovation, connecting advanced technologies, talent, and globally competitive solutions.

SLOVENIA: POWERING EUROPE'S NEXT WAVE OF AI INNOVATION

As Europe accelerates its digital transformation, artificial intelligence is becoming a key force reshaping industries, societies, and economies. In this rapidly changing environment, innovation increasingly relies on strong partnerships, international connectivity, and the ability to turn breakthrough ideas into practical solutions. Slovenia is strengthening its position as an agile, innovation-driven ecosystem where advanced technologies, talent, and entrepreneurship converge.

With a strong tradition in science, engineering and applied research, Slovenia has built a technology ecosystem that delivers impact beyond its size. Slovenian companies are internationally recognised for their specialised expertise in areas ranging from artificial intelligence, advanced software, and data science to cybersecurity, industrial automation, and digital solutions for sustainable transformation. Behind these achievements is a dynamic network of research institutions, start-ups and globally oriented companies collaborating to develop technologies that address real-world challenges.

Artificial intelligence is not new to Slovenia. The country has been one of Europe's pioneers in AI research for decades and continues to play an active international role through its research institutions, innovation ecosystem, and strategic investments in future technologies. Slovenia is also home to the first

International Research Centre on Artificial Intelligence (IRCAI) under the auspices of UNESCO, established to foster international cooperation and knowledge sharing in the field of AI for the benefit of society. With advanced digital infrastructure, strong research capabilities, and a highly skilled talent pool, Slovenia provides an environment where ideas can develop into globally competitive solutions.

SPIRIT Slovenia Business Development Agency is proud to present Slovenian technological excellence at GITEX AI Europe 2026, one of Europe's leading international platforms for technology, innovation, and investment. As Berlin becomes a meeting point for visionary founders, policymakers, investors, and technology leaders, we invite you to visit the Slovenia Business Stand and discover the companies shaping the future through innovation, creativity, and ambition.

Beyond GITEX AI Europe 2026, SPIRIT Slovenia Business Development Agency remains committed to connecting international partners with Slovenia's vibrant business and innovation ecosystem. We look forward to building new partnerships and creating opportunities that contribute to a smarter, more connected, and more sustainable future.

Tamara Zajec Balazič

Director, SPIRIT Slovenia Business Development Agency

ICT is more than a sector—it is the strategic pillar that drives competitiveness, fuels growth, and strengthens the resilience of the entire economy.

BUILDING TOMORROW'S ECONOMY THROUGH ICT EXCELLENCE

Slovenia's ICT sector is a key driver of innovation, powered by a highly skilled workforce and a strong tradition of technological excellence. Slovenian ICT companies are pioneers in the application of advanced digital technologies, particularly in the field of data and artificial intelligence. The sector provides comprehensive horizontal IT services—AI, cybersecurity, data analytics, telecommunications—as well as vertical solutions tailored for manufacturing, logistics, healthcare, and other industries. This combination enables the Slovenian ICT sector to act as essential partners in the digital transformation of the entire economy, while also supporting the development of public services, education, and society as a whole through smarter, more efficient, and more inclusive digital solutions.

Looking ahead, the next step for the Slovenian ICT sector is to scale its impact globally by strengthening international collaboration, fostering digital innovation, and further supporting smart use of data and AI in solutions across all sectors. A slogan **Slovenia - Europe's Premier Hub for AI and Data Innovation is the right positioning of Slovene ICT sector value proposition.**

GITEX AI Europe 2026 offers a unique opportunity for Slovenian companies to showcase their solutions, exchange know-how, and connect with partners to co-create the next generation of digital services.

The ICT Association of Slovenia actively supports this growth through initiatives like ZITex in promoting the internationalization of the ICT sector, Competence center for Artificial Intelligence in supporting responsible AI adoption and SRIP GoDigital, which fosters cooperation between business, research, and policy for future digital innovations.

Together, these platforms reinforce Slovenia's position as a competitive and trusted ICT partner, committed to building a smarter and more connected digital future.

Expert solutions for finance, electricity distribution and manufacturing

ABOUT THE COMPANY

Analitica specializes in providing comprehensive, academic-level professional services and software solutions across a broad range of industries. Our interdisciplinary team of experts in physics, mathematics, and computer science delivers cutting-edge solutions in financial services, electricity distribution, manufacturing analytics, and advanced artificial intelligence (ML/AI) applications, backed by a 25-year track record of success. Analitica excels in delivering highly specialized, scalable solutions for critical infrastructure and other demanding sectors.

PRODUCT/SERVICES

The company offers cutting-edge solutions for:

- manufacturing analytics (CV/HSI for QA, PMQ, planning optimization)
- electricity distribution (grid topology discovery and verification...)
- financial services (IFRS 9, ALM, treasury/asset management)
- food safety & quality (foreign particles, freshness, adulteration...)
- advanced artificial intelligence (ML/AI) applications incl. signal processing

- air pollution modeling (forecast of traffic air pollution distribution)

TARGET PARTNER

Partnerships or joint ventures with local companies to complement their expertise and solutions portfolio especially in:

- (electricity) power distribution
- advanced QA solutions for manufacturing and food processing
- financial services (banks, insurance companies, funds)
- ML/AI (for unstructured data)

ABOUT THE COMPANY

ASCALAB is an agile software development company specializing in development, DevOps, and testing services. Our passion for software and QA, combined with a strong human touch, has grown our team to 100+ experts across 4 countries. By balancing meticulous detail with the big-picture vision, our engineers apply their \”secret powers\” to deliver professional excellence. Supported by up-to-date knowledge and years of experience, we transform complex challenges into reliable, innovative, scalable, and timely solutions that accelerate business growth.

PRODUCT/SERVICES

- Full-cycle software development & custom solutions
- Backend, frontend & mobile app development
- Cloud & DevOps infrastructure optimization
- Specialized QA, testing & embedded systems
- E-commerce & Business Intelligence solutions
- Flexible team extension & dedicated tech teams
- Process setup & strategic technical consulting

TARGET PARTNER

- Companies needing software development and/or testing automation
- Start-ups, SMEs, scale ups to enterprise, enterprise IT departments
- Various industries (telecom, energy, healthcare, insurance, banking etc.)
- Companies seeking long-term tech partners

Aurora360 & HyperSharp: AI-native delivery and data anonymization

ABOUT THE COMPANY

Comtrade 360 is a software engineering and digital transformation company with 30+ years of experience helping enterprises modernize and scale mission-critical systems. Powered by our Aurora360.ai™ Framework—an AI-native delivery model for rapid prototyping, product engineering, and production-ready enterprise solutions— we combine proven engineering discipline with AI acceleration to deliver measurable business outcomes. Together with HyperSharp.ai™, we ensure all your sensitive data remains secure and never leaves your environment.

PRODUCT/SERVICES

- Aurora360.ai™ – AI-native SDLC & engineering accelerator
- Rapid prototyping to production-ready enterprise solutions
- Mission-critical system modernization
- Product co-development & strategic takeover
- Enterprise AI enablement & AI solutions
- HyperSharp.ai™, Privacy-preserving data sharing & governance
- Secure cloud-native architectures & integration
Aurora360.ai™ & HyperSharp.ai™: AI-native delivery and data anonymization

TARGET PARTNER

- Large enterprises operating mission-critical systems
- Public-sector and government organizations
- Technology vendors and product companies
- System integrators and digital transformation partners
- Organizations in regulated industries (finance, health, telecom)
- Enterprises adopting AI and data-driven solutions
- Partners seeking secure data sharing and anonymization solutions

DEMETRA

LEAN WAY

Lean 5.0 system connecting strategy, KPIs, people, and execution into measurable operational results.

ABOUT THE COMPANY

DEMETRA Lean Way is a specialized company for Lean management, operational excellence, and digital transformation. With more than 25 years of industrial experience and our own digital platform — PERFORMANCE STORYBOARD® — we help companies transform strategy, KPIs, and decisions into daily execution and measurable results. We combine Lean expertise, digital technologies, and AI to build data-driven, people-centered systems that improve productivity, transparency, and sustainable growth.

PRODUCT/SERVICES

- Lean 5.0 Performance Management System
- Digital Shopfloor Management & KPI System
- Strategy Deployment & Execution Management
- TPM, OEE & Maintenance Management System
- Digital Audits, Gemba & Compliance Management
- Structured Problem Solving (A3, 8D, PDCA)
- Skills Matrix & Workforce Competence Management

TARGET PARTNER

- Manufacturing & industrial companies worldwide
- Mid-sized companies, large enterprises & groups
- Lean, TPM & operational excellence consultants
- Digital transformation & system integrators
- Worldwide implementation partners & distributors
- Companies focused on OEE & productivity improvement
- Organizations implementing Lean 5.0 Performance Management Systems

WAY TO EXCELLENCE

morefromfood

Make food safety compliance simple, automated and fully traceable

ABOUT THE COMPANY

MoreFromFood provides a digital solution for simplified food safety management and compliance with GFSI standards (IFS, BRCGS, FSSC 22000). It replaces manual and disconnected processes with centralized, always up-to-date documentation, ensuring full traceability and real-time visibility. The result is reduced administrative workload and errors, faster audits, and better control over processes with data-driven decision-making.

PRODUCT/SERVICES

- Food safety management digital platform
- GFSI compliance (IFS, BRCGS, FSSC 22000)
- Centralized documentation management
- Full process traceability
- Real-time monitoring & alerts
- Audit preparation & support
- Process automation & reporting

TARGET PARTNER

- SMEs and enterprises in the food industry
- system integrators
- partners for implementation and resale
- distributors
- investors

Transforming complex business challenges into scalable digital products.

ABOUT THE COMPANY

higroup is a Slovenia-based digital product agency that helps companies design, build and scale custom digital solutions. We work across web platforms, mobile apps, internal tools, e-commerce systems, cloud infrastructure and system integrations.

Our team combines product strategy, UX/UI design, software development and DevOps to support clients from discovery and prototyping to full implementation and long-term support. We have experience working with companies such as Otsuka Pharmaceutical, Medis, Knauf Insulation, T-2 and other clients across healthcare, manufacturing, sustainability, retail and technology.

PRODUCT/SERVICES

Digital Product Development - Custom web and mobile apps built from idea to launch.

Web Platforms & Portals - Internal tools, customer portals and B2B platforms.

UX/UI Design - Clean, user-friendly interfaces for digital products.

System Integrations - Connecting ERPs, CRMs, APIs and third-party tools.

Cloud & DevOps - Cloud setup, deployment, monitoring and scalability.

Product Discovery - Defining scope, features, architecture and project direction.

AI & Automation - Smart tools that improve workflows and reduce manual work.

TARGET PARTNER

Companies looking to digitize processes, build custom platforms, improve internal workflows, or scale their digital products with a reliable development partner.

Turn presence into pipeline

ABOUT THE COMPANY

GTM on the Ground is a relationship-driven go-to-market (GTM) framework for B2B companies turning presence into pipeline. Developed by Jasna Klemenc Puntar, it combines LinkedIn, networking systems, trade shows, conferences, positioning, and AI-assisted workflows into practical growth systems. Through strategic advisory, workshops, cohort-based programs, and event activation support, the framework helps companies build visibility, partnerships, and measurable business opportunities.

PRODUCT/SERVICES

- Strategic advisory & GTM execution
- GTM operations & growth systems
- AI-assisted GTM workflows
- Referable Profile™ Sprint
- LinkedIn & digital networking systems
- Trade show & conference activation
- Workshops & cohort-based programs

TARGET PARTNER

- B2B tech, SaaS, AI, industrial, and digital-first companies
- Business owners, founders, and leadership teams
- Sales, business development, and partnership teams
- Marketing and product marketing professionals
- Startups, scaleups, and SMEs entering new markets
- Companies attending trade shows and conferences
- Incubators, accelerators, technology parks, and innovation ecosystems

FROM PRESENCE TO PIPELINE

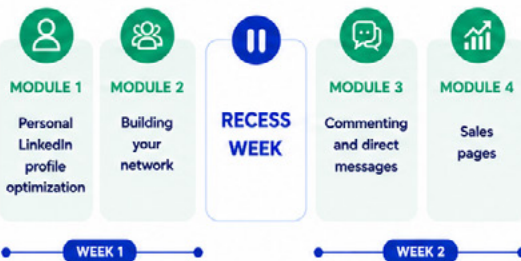

Two frameworks. One goal: more visibility, better relationships, real opportunities.

1. PERSON | BUILD YOUR PRESENCE

REFERABLE PROFILE™ SPRINT

Turn your LinkedIn presence into a consistent source of business opportunities in less than a month.

A structured, AI-assisted sprint that transforms profiles, networks, and conversations into a referral-driven pipeline.

2. NETWORK | EXPAND YOUR OPPORTUNITIES

GO-TO-NETWORK OS

Build the right relationships in the right places.

3. COMPANY | TURN RELATIONSHIPS INTO GROWTH

GTM ON THE GROUND FRAMEWORK

A practical system that turns relationships, events, and execution into measurable growth.

OUR APPROACH
AI-POWERED.
HUMAN-CENTERED.
RESULTS-DRIVEN.

AI-ASSISTED WORKFLOWS
Work smarter.
Save time.
Focus on people.

HUMAN-CENTERED APPROACH
Technology supports.
People connect.
Relationships grow.

PRACTICAL & EXECUTION-FOCUSED
Clear steps.
Real actions.
Measurable results.

BUILT FOR B2B GROWTH
From visibility to valuable opportunities.

FLEXIBLE & ADAPTABLE
Works for any market, industry, or team.

PRESENCE BUILDS OPPORTUNITIES. RELATIONSHIPS CREATE VALUE. EXECUTION DRIVES GROWTH.

@jasnaio

Turn event presence into a growth engine for international success

ABOUT THE COMPANY

Empower companies to maximize ROI from tradeshows and international events. Specialized support for B2B tech, AI, cybersecurity, and supply chain and digital transformation companies looking to generate qualified meetings, enter new markets, build partnerships, and strengthen global visibility. The Network Expansion Methodology, tested in 200+ campaigns and across 20,000+ contacts, combines go-to-market strategy, outreach, CRM alignment, and structured follow-up to convert event participation into measurable business growth and long-term sales opportunities.

PRODUCT/SERVICES

- Go-to-market strategy & market entry
- Lead generation & sales pipeline building
- Strategic partnerships & network expansion
- Event & trade show marketing support
- Brand positioning & messaging Outreach, CRM & automation systems
- Post-event conversion & growth strategies

TARGET PARTNER

- B2B tech companies (AI, cybersecurity, supply chain, digital transformation)
- Startups, scale-ups & enterprises expanding globally
- Companies entering new international markets
- Exhibitors at global events (e.g. GITEX Europe)
- System integrators & strategic partners
- Distributors & business development partners

The Operating System for Smart Cities built on EU open standards

ABOUT THE COMPANY

NeoPolisTech builds NeoPolis OS, the operating system for European smart cities. Like applications on Android, solutions from different vendors run on the same infrastructure — standard interfaces, any vendor, your data. Each city deploys its own branded application with full control over every data source. CityConnect, our flagship app, combines multimodal trip planning with dynamic carpooling and sharing. Live in Slovenia, Czech Republic and Austria, expanding further across the EU.

PRODUCT/SERVICES

- NeoPolis OS — smart city runtime for municipalities
- Branded mobile and web app under municipal brand
- Operator dashboard with per-adapter service control
- REST API for first-party and third-party developers
- Multimodal mobility with pan-european carsharing
- CityConnect — EU-wide consumer reference deployment
- Custom integration and implementation services

TARGET PARTNER

- Municipalities and city authorities
- Smart city integrators and consultancies
- Transport authorities and open-data initiatives
- EU-funded research and innovation consortia

CityConnect - it's first app.

The problem isn't the data. It's fragmented knowledge.

ABOUT THE COMPANY

OneQlue is an AI harness designed for industrial and manufacturing companies. It brings together information from ERP systems, technical documents, 2D drawings, 3D models, and production data into a unified industrial decision layer. By connecting and understanding data across different sources, OneQlue helps teams access the right context faster, reduce repeated work, and make better engineering, production, and operational decisions.

PRODUCT/SERVICES

- Cross-platform engineering knowledge retrieval
- 2D technical drawing understanding
- 3D model understanding
- RFQ & pricing intelligence
- Production troubleshooting support
- On-premise or cloud deployment

Production planning based on realistic predictions, not ERP standards!

ABOUT THE COMPANY

QLECTOR provides the AI-based platform Qlector LEAP, which enables manufacturers to plan, schedule, and optimize production using realistic production time predictions based on historical data instead of relying solely on ERP normatives. The platform optimizes production sequencing, helping manufacturers improve production flow and resource utilization. It also enables workforce scheduling based on people's availability, skills, and production requirements.

By improving efficiency, flexibility, and transparency, Qlector LEAP helps reduce the hidden costs of inefficient planning, which typically consume up to 10% of revenue.

PRODUCT/SERVICES

Qlector LEAP uses machine learning and historical data to predict realistic production times, optimize production sequencing, and improve material forecasts and delivery accuracy. Combined with workforce scheduling based on skills and people availability, it improves transparency and planning visibility, reduces organizational downtimes, and helps companies optimize inventory levels and reduce costs.

TARGET PARTNER

Medium and large enterprises in discrete or process manufacturing. Partners to resell our solutions. Investors.

Turn AI potential into real business value, fast and supported.

ABOUT THE COMPANY

Technology Park Ljubljana (TPLJ) is Slovenia's leading innovation hub for startups, scaleups, and advanced technologies.

TPLJ is a partner in SLAIF – Slovenian AI Factory, a national initiative connecting AI, HPC, and innovation support to strengthen Slovenia's AI ecosystem. TPLJ also runs AI Hub Slovenia, a platform that connects AI experts, solution providers, and companies to accelerate AI adoption and business growth.

PRODUCT/SERVICES

- Access to the Slovenian AI Factory (SLAIF) ecosystem
- Access to HPC infrastructure and supercomputing resources
- Workshops and technical support for AI implementation
- Hands-on training programmes and specialised upskilling courses
- Catalogue of AI services and solutions
- Incubation and scale-up support: Mentorship from top experts, access to funding, and international networking opportunities
- Innovation infrastructure: Modern workspaces, access to laboratories, and testing environments

TARGET PARTNER

- Technology-driven companies — SMEs and corporates implementing digital transformation, AI, and Industry 5.0
- Research institutions and academia in the field of AI
- Policymakers and decision-makers shaping the technological ecosystem
- Ambitious individuals and talents developing breakthrough solutions

POWERING THE FUTURE OF AI IN BUSINESS

ABOUT THE COMPANY

Tiko Pro is a leading EU funding and innovation consultancy headquartered in Slovenia, with a representative office in Croatia. We support ambitious organisations in transforming innovative ideas into funded, scalable, and market-ready solutions. Operating at the intersection of technology, innovation, and strategic funding, we help companies accelerate growth, strengthen competitiveness, and access European and national funding opportunities for R&D and digital transformation. Our clients include large enterprises, deep-tech startups, scale-ups, SMEs, research organisations, and public institutions across Europe — particularly in sectors such as AI, cybersecurity, Industry 4.0 and Industry 5.0, digital infrastructure, health technologies, dual-use technologies, and advanced manufacturing. Our expertise covers major European programmes, including: Horizon Europe, Digital Europe Programme (DEP), European Defence Fund (EDF), Eureka, LIFE, CEF, Innovation Fund, and other strategic EU instruments.

PRODUCT/SERVICES

Tiko Pro provides end-to-end support throughout the entire innovation lifecycle: • EU funding strategy and opportunity identification • Consortium building and partner matchmaking • Proposal development and submission • Project communication and dissemination • EU project

management and implementation support

TARGET PARTNER

- AI, cybersecurity, and deep-tech companies
- Defence, dual-use companies
- Critical infrastructure technology providers in energy, transport, and telecommunications
- Industry 4.0, Industry 5.0, robotics, automation, and digital twin solution providers
- HealthTech and digital health innovators
- Industrial and manufacturing companies driving digital transformation
- SMEs, scale-ups, corporates, research organisations, and public institutions seeking EU funding and consortium partnerships
- Organisations looking for experienced partners in Horizon Europe, Digital Europe, and cross-border R&D project development and management

Strategic creative agency built for modern B2B content.

ABOUT THE COMPANY

XOD Agency is a Slovenian media production and marketing studio creating premium content for B2B brands, tech companies, and event organizers across Central Europe. We produce brand films, TV commercials, executive podcasts, vertical social video, and full event coverage. One production day with us typically delivers a full month of multi-platform content. With cinema-grade equipment and an in-house creative team, we work as a strategic content partner, not a commodity production vendor.

PRODUCT/SERVICES

- Brand films, TV commercials & corporate video production
- Premium vertical video for LinkedIn, Instagram & TikTok
- B2B podcast production (full turnkey, end-to-end)
- Event coverage, aftermovies & on-site media management
- Executive, product & corporate photography
- Documentary storytelling & long-form video content
- Social media content strategy & creative direction

TARGET PARTNER

- B2B companies in tech, AI, cybersecurity, fintech and manufacturing exhibiting or scaling across Europe
- event organizers and conference producers
- corporate marketing and communications teams
- PR and brand agencies seeking a premium production partner in Central Europe

Content That Tells Your Story.

Empowering Slovenian ICT exports through global connectivity

ABOUT THE COMPANY

Since 2008, ZITex has operated as a strategic group of export-oriented Slovenian ICT companies within the ICT Association of Slovenia, under the Chamber of Commerce and Industry of Slovenia. It fosters collaboration, innovation, and global competitiveness while playing a key role in digital transformation. ZITex acts as a bridge between international markets, industries, and the government and supports exports of the Slovenian ICT sector.

PRODUCT/SERVICES

- Foreign Market Intelligence and Export Support
- Developing National ICT Infrastructure
- Connecting Foreign Companies with the Slovenian ICT sector
- Creating Business Opportunities
- Raising Export Quality and Standards
- Shaping Policy

TARGET PARTNER

- ICT Companies
- Foreign Companies interested in the Slovenian ICT sector
- Business Support Organizations and Industry Associations and Clusters
- Government and Public Institutions
- Industry Associations and Clusters
- Research and Academic Institutions
