

 **InterCargo Truck**[®]

Manufacturing
of Special
Vehicles

InterCargoTruck LLC offers the next proposals.

Production of autonomous mobile vehicles, based on truck chassis:

- medical offices,
- diagnostic laboratories,
- mobile operating rooms,
- x-ray rooms,
- dental offices, etc.

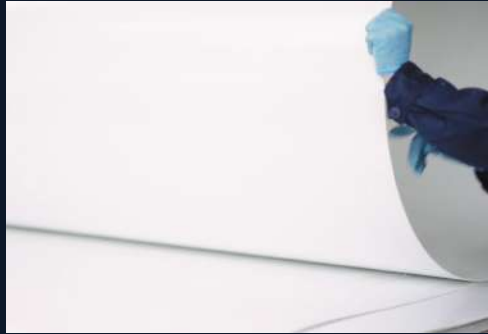

The trucks are designed in compliance with the requirements of the UNECE International Regulations.

Frameless technology of body production with strong insulated sandwich panels, gives the strength of the structure, the possibility of driving mobile medical vehicles both on general roads and off-road.

Mobile medical and diagnostic offices can be used in various climatic zones and at any time of the year.

There is a possibility to use an autonomous energy: the independent power supply system of the installed equipment from an electric generator and from the external connection. It is possible to use “green energy” – solar panels on the roof.

Design the location of windows, doors, niches and hatches meets the needs of ergonomics, ventilation and free movement of the staff and patients (including those who are unable to move independently).

All user requirements are taken at the design stage.

A special lift can be installed for patients with disabilities.

All technical and auxiliary elements are combined with the maximum efficiency of the main space of an office.

All the necessary tools for establishing the microclimate and sanitary condition of the mobile office autonomous heater, air conditioner, convectors, air purifiers, bactericidal lamps.

If necessary, it is possible to install sliding supports that give the car horizontal stability during operation, which is extremely important for some high-precision diagnostic procedures.

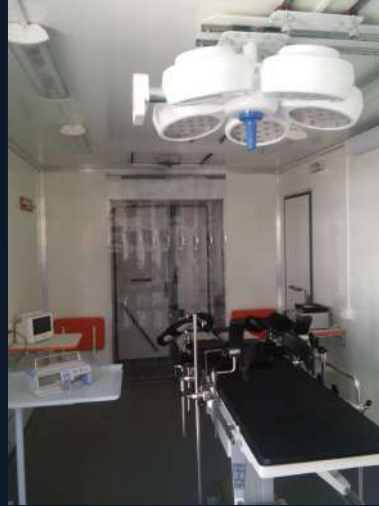

The furniture is specially designed for medical institutions. There are special clamps for fixing moving elements when moving the car.

Internal wall covering is made of galvanized steel. It is possible to use a special antibacterial polymer fiberglass that destroys viruses and bacteria on its surfaces.

The mobile office can have partitions or separate zones.

Compartments for X-ray installation and other ionizing devices are protected by the lead sheets which are built in the panel and a door for protection of personnel and environment.

It is also possible to install an autonomous water supply system with tanks for clean and used water, equipment bathrooms and showers, water heaters.

Installation of oversized equipment is possible during the assembly of the medical van. Any technical solutions are available to meet the needs of the Customer.
