

FLAGMANYACHTS | Motor boats

FIREBALL

DESCRIPTION

The yacht is designed for operation on inland waterways in places with shallow depths of about 1 mt. The hull and superstructure are made of aluminum alloy. The optional tender elevator on the stern have carrying capacity of 600 kg, which allows you to easily lift an inflatable boat or a jet ski on board, as well as use its like a semi-submersible bathing area. A small draft of the motor yacht provides a comfortable approach and descent to the shore along the armed gangway. Passengers and crew are accommodated

in four cabins, which in turn are divided for two master cabins of increased comfort in the bow and stern with separate bathrooms and showers, a starboard guest cabin and a crew cabin. All cabins are equipped with the necessary number of built-in lockers and cabinets, and small refrigerators are additionally installed in the master cabins. The main salon is located in a superstructure on the platform, equipped with a large galley, a bar, as well as an internal control post.
