WHAT

DIGITALmeet is a place of meetings, events and researches strictly related to the digital world, the ICT and the web.

Four days to pacifically occupy the cities – Venetians but not only – with **a digital culture that finally is accessible to everybody**. A digital world capable of making our lives easier, of developing local companies and contributing on the creation of a new economy.

Further from those meetings where practice is overwhelmed by theory, **DIGITALmeet** wants to change the tack showing how the digital world is capable of “changing our lives and our economy”.

DIVULGATION

HOW

DIGITALmeet2014 puts on the table **the big issues of the digital world** to look for new solutions about territory and enterprises.

The big issues that will enliven the events of 2014 edition are:

- BIG DATA
- INTERNET OF THINGS
- HUMANISTIC MANAGEMENT
- TOURISM
- DIGITAL MANUFACTURE
- DIGITAL SUSTAINABILITY

WHY

Talking about the digital world is not enough!

The purpose of **DIGITALmeet** is to spread the digital culture and to compare new ideas, new philosophies, new people to enrich their culture, their knowledge and their connections.

Other important purposes are to help **enterprises** improving their own organisational set-up and broadening their commercial horizons; **new generations** to find their own spaces in order to share and improve new knowledges; **local areas and communities** to make themselves efficient in a sustainable way.

SUCCESSFUL CASES
new ideas

WHERE

Old routes are no longer existing, we need new ones.

A way to do this is to break the old territorial logic, connecting again the pieces of the “historical” Northeast with **other places**, more or less close to it, but that can be **assimilated** to territorial structure, entrepreneurial network, diffusion of scientific and technological research, grade of implementation of new technologies.

According to this basic idea, **DIGITALmeet** spreads its events within **Veneto, Trentino, Friuli Venezia Giulia, Austria/Carinzia, Slovenia, Croatia.**

Many places but only one tale...

NEW COORDINATES
one tale

FORMAT

One of the purposes of the appointments of **DIGITALmeet** is to support the union between two worlds that seems to be parallel, the real and the digital world: in fact, so often, this union is the consequence of a compromise that opts for the characteristics of one world renouncing to the other.
