INTRODUCTION

Metal processing industry as a sector encompasses three main activity fields: metalworking, machine-building and transport means manufacturing. As such it represents one of the strongest sectors within national manufacturing industries. With its 26% of employees it generates 32% of export and 29% of income of all manufacturing companies in Slovenia. Metal processing sector employs more than 55.000 employees

Metal processing industry within manufacturing industries

More than 2.000 companies realised almost 7,3 bn € revenue in 2007, 4,8 bn € of that was from export sales. Exporting two thirds of its production means being tersely involved in global business world. Share of exports as well as its absolute value are increasing steeply over past years. From modest 3 bn€ worth export in 1998 the number has reached 4,8 bn€ in 2007.

Subsectors in metal processing industry

Of the three aforementioned subsectors, metalworking one is the strongest in means of employment- it comprises of 50,2% of all employees in metal processing industries, it represents 42% of total income and almost 48% of value added accumulated in all three fields of activities.

REVENUE

Export

Most of export value is result of foreign sales from motor vehicle producers and automotive industry's suppliers. Forging, steel constructions, mechanical parts and components and machine building are also among strongest exporters. Majority of products exported is sold into European Union (Germany, France, Italy, Austria,...); Balkan region is a traditional export market and far-East, fast growing markets are also becoming more and more common destination.

Workforce

Metal processing industries boasts a long industrial tradition. This, coupled with good command of foreign languages (91% of population is able to communicate in in at least one foreign language and 71% of population in at least two of them) forms a competitive edge. Technologically-minded, highly educated (in metal processing industries: 16% university degree, 62% secondary school) employees represent a workforce that is not cheap, but cost-effective.

Description of company:

GENERAL INFORMATION Bial, Ltd., Celje today ranks among the leading companies for tube radiators in central and eastern Europe. Our business operations are centred upon metallic activities which, in addition to the production and sale of tube radiators, also include the production and sale of electric tube radiators and bath accessories. Our products are marketed in more than 10 countries all over Europe. Ten percent of our production is sold on the domestic market, while the rest is exported, thus ranking Bial among average Slovenian exporters. Our capacities are directed towards the development of modern and useful shapes of all kinds of tube radiators. At Bial we are well aware that quality is the precondition for business success, and also a crucial factor in competitiveness and productivity. Production is carried out in accordance with international standards NF. Our mission – More than Just Heat – is realized through the rich range of our products and services, through investment in people and the environment. Our commitment is to realization of our vision through our own development, international connections, flexibility and efficiency, to consolidate Bial's position as one of the leading companies for tube radiators on the markets of central and eastern Europe, and expand onto the markets of the European Union.
